Glenelg.
'Phone X. 1291

FOREWORD.

In presenting our 1929 Pocket Catalogue of Trees, Shrubs, Plants, Seeds, etc., we take this opportunity of thanking our many customers all over Australia for the support they have extended to us during past years, and we trust that by strict attention to appreciated orders we will retain their confidence and continue to receive their support.

We make no pretence to an elaborate Catalogue, descriptions of the lines we offer are short and concise, nor do we claim that sections given to Roses, Fruit Trees, Shrubs, etc., includes all that may be grown. We have omitted all second-rate varieties, and have retained only those that are worth while growing.

OUR NURSERIES at Lockleys, covering 30 acres extending from the Henley Beach Road, back to the River Torrens, are noted for their comprehensive collections of trees and plants, and for healthy growth. Our Trees and Plants are well grown, vigorous and clean, and when transplanted and cared for as they should be, will forge ahead and give growers every satisfaction.

OUR SEED DEPARTMENT has been enlarged and a regular supply of fresh seed from specialists in Australia and the World's foremost growers is kept up. Lasscock's "Quality" Seeds can be relied upon to supply customers with best strains to give best results.

Bulbs are a speciality with us, and in season we offer the more popular sorts at most reasonable rates.

SEEDLINGS ARE ALSO SPECIALS WITH US. Both flowers and vegetables and sturdy plants of all kinds are raised at our Nurseries to supply the demand of customers who prefer to purchase seedlings rather than raise their own.

OUR FLORAL DEPARTMENT. We remind customers that we supply choice Cut Flowers, beautiful Wreaths, Bouquets, Posies, etc., at shortest notice, either from Headquarters at Lockleys, or from our Port Adelaide and Glenelg Branches. We specialize in Wedding requirements, and can supply floral decorations for all social functions.

VISITORS ARE WELCOME to our Nurseries at all times during working hours, and on Saturday afternoons up to 4 p.m. We invite inspection by those interested in gardens and gardening, whether purchasers or not. Our Glasshouses, shadehouses, and open spaces will be found interesting at all times, but more especially in the rose flowering seasons—Spring and Autumn—when our roses may be seen in all their beauty.

Henley Beach and Lockleys cars from Currie Street stop at the Nursery gates.

OUR "GARDEN REMINDER," which is now issued in a convenient booklet form, is sent out monthly to many thousands of interested gardeners, who find the information contained therein helpful. We shall be pleased to add to our mailing list the names of any interested in gardens who would care to receive a copy monthly, for which no charge is made.

Shortest Notice at Moderate Prices.

'Phone Nurseries or Branches.

THE NURSERIES—HEAD OFFICE.

The General Nursery covers thirty acres of land, situated on the Henley Beach Road, Mellor Park. It is within the third tram section from the City, and the Henley Beach and Lockleys cars stop at the Nursery front gate.

THE BRANCHES.

The Port Adelaide Branch is situated at St. Vincent Street, near the Old Port Adelaide Railway Station. 'Phone No.: J2741.

The Glenelg Branch is situated at 52 Jetty Road, near to the Railway Terminus. 'Phone No.: X1291.

In addition to Wreaths, Bouquets, Posies, and Choicest Cut Flowers, full stocks of all Plants, Trees, and Seeds can be obtained from both Branch establishments.

The Central Market Stall Depot, which is open for the sale of all plants and seeds Every Friday and Saturday, will be found at the rear of Bishop's, Gouger Street, Refreshment Rooms, at the end of the second promenade from Grote Street.

This Catalog revokes all previous prices,
and all prices quoted are subject to market
fluctuations.

TERMS OF BUSINESS.

CONDITION OF SALE AND NON-WARRANTY.

We believe that all Seeds, Seedlings, Bulbs, Trees, Plants, Cuttings, and Roots sold by us are of the description and kind specified by us at the time of sale, but owing to the practical impossibility in many cases of being certain of this, we give no undertaking that such Seeds, Seedlings, Bulbs, Trees, Shrubs, Plants, Cuttings, or Roots will correspond with the description under which they are sold, and **WE MAKE ALL SALES SUBJECT TO THE CONDITION** that there is no such undertaking by us. We further give no warranty, expressed or implied, as to their growth, description, quality, or productiveness, and will not be in any way responsible for the crop. If the purchaser does not accept the goods sold to him on these terms, they are at once to be returned to us, and any money paid to us will be refunded.

Ordering—Name and Address.—Customers, when ordering, are requested to give their full name and address, together with full directions as to how they wish the goods to be sent, whether by carrier, rail, or boat, and to whose care the goods must be consigned.

Substitution.—Whilst every endeavour is made to fulfil all requests, it is sometimes impossible to do so when orders reach us well on in the season, and certain varieties are sold out. Customers will oblige by adding a few extra names of varieties, as a second choice. We will substitute unless directed otherwise.

Selection of Varieties.—When the choice of varieties is left to us, we will carefully select the most desirable sorts, and the best varieties suitable to the customer's district.

Terms.—Our terms are strictly cash, one month from the date of invoice to regular customers. With new customers a deposit with the order is necessary, or a satisfactory reference to some city firm must be given.

When Cash accompanies Orders we will add gratis extra plants or seeds "with our compliments."

Remittance.—For ordinary payments, customers may remit by Bank Draft, Cheque, or Post Office Order. Small amounts should be remitted by Postal Notes, payable Adelaide.

For Better Gardens and Best Results.

Packing.—Cases, Bags, and Straw Bundles, used in packing, will be charged at actual cost price. The greatest care is taken in the packing of all plants and trees, so as to ensure their arrival in good condition.

Parcels Post (a cheap and speedy delivery).—Roses, Plants, and Fruit Trees can be forwarded by Parcels Post to far distant parts of the State, or to the other States, at the following rates:—Limit, 11 lb. for one parcel—Within South Australia: First lb., 6d.; each additional lb., 3d. Victoria, New South Wales, Queensland, Western Australia, Tasmania, and New Zealand: First lb., 8d.; each additional lb., 6d.

Complaints.—Advice of despatch of goods are posted immediately, and no complaints will be entertained unless made within 14 days from receipt of same.

Plants, Trees, Seeds, and Bulbs not included in this Catalog.—We shall endeavour to procure any of the above that may not be herein listed.

We Want All Your Business.—No order is too large, and none too small, to receive prompt and careful attention.

DELIVERY.

We deliver all orders to City and Suburbs by our own conveyances. In most instances a regular delivery is made to the main Suburbs one day each week, and the following is a guide to intending purchasers in out-lying suburbs. All orders 'phoned or sent in by noon the day before can be delivered next day:—

MONDAY.—MORNING—Kilkenny, Woodville, West Croydon, Rosewater, Yatala, Queenstown, Cheltenham, Alberton, Port. **AFTERNOON**—Torrensville, Mile End, City, Hackney, St. Peters, Walkerville, Gilberton.

TUESDAY.—MORNING—Keswick down to Glenelg and Brighton, Somerton, Novar Gardens, Plympton, Clarence Park, Lower Mitcham, Colonel Light Gardens, Edwardstown, Westbourne Park, Goodwood, Millswood, and Wayville. **AFTERNOON**—Victoria Park, Rose Park, Dulwich, Toorak, Burnside, Marryatville, Rosslyn Park, Kensington Gardens, Norwood.

Lasscock's Nurseries, Lockleys, South Australia.

WEDNESDAY.—MORNING—Port Adelaide, Largs Bay, Semaphore and District. **AFTERNOON**—Hyde Park, Unley, Malvern, Parkside, Knoxville, Linden Park, Fullarton, Glen Osmond.

THURSDAY.—MORNING—Glenelg and District only. **AFTERNOON**—Hindmarsh, Welland, Croydon, Bowden, North Adelaide, Prospect, Medindie, Broadview, Dudley Park, Nailsworth.

FRIDAY.—St. Peters, Payneham, Tranmere, Royston Park, Evandale, Maylands, Magill, North Kensington, Newstead and District, Port Adelaide to Woodville.

SATURDAY.—Torrensvile, Hilton, Henley Beach, and Grange, and near Suburbs.

SPECIAL TRIPS are made to all Suburbs to fit in as near as possible with customers' wishes.

CITY.—All orders are delivered every day to all business houses, firms, etc., throughout the City. Customers who can take delivery of their goods in City will help to relieve the heavy, long journeys to Suburbs. We make a special effort to have goods sent to business premises each day to suit customers. Make use of our services and secure all your requirements from us.

A CHARGE OF 9d. per delivery is made on all orders outside of City Radius and to far distances, such as Semaphore, Largs Bay, Brighton, Fullarton, Glen Osmond, 1s. is charged for each delivery.

COUNTRY ORDERS.—These are delivered to goods and passenger trains or carrier daily. Consignments under 14 lb. are not accepted for despatch per goods train. We therefore use our own discretion and send per goods train if over 14 lb.

SPECIAL NOTICE.—All Roses and Trees coming from our Nurseries carry our special printed label. It is necessary to see that parcels of Roses and Trees are carrying the genuine Lasscock's Label.

For customers' own protection and our safeguard we urge that they satisfy themselves as to the labelling of the trees.

Our "Reminder" is printed Monthly and available to all our Customers without charge. Ask us to send you one.

SOME HINTS ON ROSE GROWING.

Providing the situation is an open one, roses may be grown in almost any class of soil. If the sun reaches the plants for an hour or two at some portion of the day they may be grown, but not in perpetual shade.

In rose growing good drainage is essential. Water-logged soil may kill plants during a wet winter; in any case the plants will not thrive if the drainage is defective. If the natural drainage is deficient, drains should be made before planting is done.

In the mixed flower border half-standard roses may be favoured, so that annuals and other small plants can be grown around them. Low half-standards, showing about 12 to 18 inches of stem above the soil, are preferable to taller trees, which often become scorched on the stems, or "stock" as they are usually termed.

Dwarf-worked roses do particularly well; they give splendid results. The demand for them is growing rapidly, and most rose growers prefer them.

Special rose beds give the best results for the production of ideal blooms, for in them the watering can be regulated more satisfactorily than is the case with plants growing in a mixed border. Nevertheless, your mixed border must have its quota of rose plants.

Trenching the ground, particularly new soil, is worth while; the deeper the digging the better. It is always best to dig over the whole of the plot to the same depth rather than confine the digging to holes which may invite surplus moisture and check growth. If the top surface is removed to the full fork or spade depth, and the lower soil broken up, so as to make the depth of loosened soil 18 inches in all, it will give good results and serve the purpose of the average grower. Opening the ground to a depth of 2 ft., or even 30 inches, when exhibition blooms are desired, will ensure quality blooms over a longer term of years. Manures should be well worked into the lower soil.

In sandy soils such as is met with at the seaside, heavy loam should, if possible, be worked into it, together with plenty of well-decayed cow manure, vegetable matter, grass, or seaweed, also bonedust to the top spit, using about a couple of handfuls to each plant.

Lime, which has a binding effect on sand, and the reverse action on heavy land, should always be employed in rose growing. Spread it on the surface and dig in before any manures are added. Subsequent watering will carry the lime through to the lower soil.

Fairly heavy soil is the better for rose growing, but if over-heavy it may be lightened by first liming liberally, and afterwards adding sand, grit, decayed vegetable matter, and well-decayed cow or stable manure. A sprinkling of bonedust, about a handful to each plant, may also be added. Avoid making the soil over-rich. Extra stimulant can be given the plants when they require it. This can be provided by a heavy mulch of half-rotted stable manure at the approach of hot weather and by the application of dry or liquid manures when the flowering period approaches. Blood manure, superphosphate, or dried fowl manure makes a good top dressing, or liquid, made from cow manure, and a little soot can be given to improve the flowering. Dilute the liquid to the colour of weak tea and give the plants a weekly supply to moist soil. Plants grown in good virgin soil will need little manuring during the first two years, but liberal liming in this class of soil is advisable to sweeten it and to free the plant food already there.

It is best to prepare soil some time before planting. Between the first digging and the planting the soil should be frequently turned over to sweeten by the action of the air and sunlight. The more the soil is turned over the better. With each turning leave the soil surface as rough as possible.

In established gardens, where the soil has been well worked, a couple of turnings may be sufficient.

HEELING IN. Should your plants arrive when it is not convenient to plant them, or should the soil be unprepared, defer the planting even if it is for a few weeks. The plants will not be harmed if they are planted temporarily in an out-of-the-way corner. Open up a trench and plant them at a sloping angle. Draw the soil about the roots, make it moderately firm, and water.

PLANTING. Avoid planting in holes that may eventually become water-logged. This may happen with plants put into deep holes where the surrounding soil is not also deeply dug. It is better to dig all over the bed to the same depth, in order to avoid the accumulation of water about the roots. Much depends upon the class of soil in which the planting is done. In some gardens large square holes may be taken out for planting without any fear of creating a water-holding hole.

Standard roses will need support. Jarrah stakes, one inch square, are the best. Place these in position before the trees are planted and tie them to the stake.

For Better Gardens and Best Results.

Crooked standard roses are most aggravating and unsightly.

Roses may be planted 30 inches apart, if need be, but the space may be increased, with advantage to the plants, to 3, 4, 5, 6, or 8 ft. apart, according to the space at command. Strong growers will need plenty of elbow room. Planting may commence after the early autumn rains, and be continued until August.

The depth of the planting should be determined by the soil mark showing on the plants as they come from the nursery, although one may plant deeper to obtain a uniformity of height in the standards.

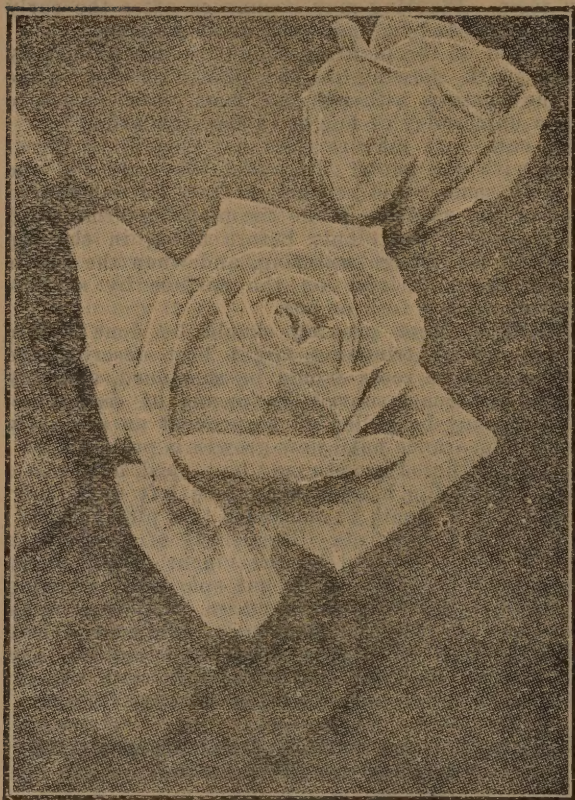

Take care that manure does not come into direct contact with the roots. To avoid this surround the roots with some sweet soil taken from an unmanured portion of the garden. Make the planting firm; tread the soil around the plants before filling in the top spit. Give a thorough watering, and when the soil is workable, keep it loose on the surface by shallow cultivation with a fork or hoe.

PRUNING. Root pruning should be done before planting. Root trimming might best describe the operation. Large roots should be shortened, and any damaged portions removed by means of seccateurs. The leaves may be pulled off to prevent an unsightly withered appearance until new growth is pushed out.

Any soft withered growth may be topped, but drastic pruning of the top hamper should be left until July, when the shoots should be shortened to a plump "eye" that is pointing outwards. The length of wood taken off should be determined by the vigour of the plant. Strong growers require to be cut sparingly, allowing from six to eight leaf buds to remain. Cut back weak growers to leave three or four buds. Thin out centre growth to keep that part open, and remove any branches that are crossing to interfere with others; sacrifice the weaker and retain the best.

ABBREVIATIONS USED IN DESCRIBING THE VARIOUS ROSE CLASSES.

- T.—Tea Scented.
- H.T.—Hybrid Tea.
- H.P.—Hybrid Perpetual.
- B.—Bourbon.
- N.—Noisette.
- P.—Polyantha.
- W.—Wichuriana.
- Per.—Pernetiana.
- H.B.—Hybrid Briar.

THE ROSE
"DAME EDITH HELEN."

See the description on the opposite page.

STRONG PLANTS,

Standards, 2/6 each; Dwarf Worked, 1/9 each.

A WONDERFUL ROSE.
"DAME EDITH HELEN."
(H.T.)

The Finest Novelty Rose sent out for years.

Alex. Dickson & Sons, Ltd. (Ireland), the raiser, wrote as follows:—

"Probably nearest to the ideal we have yet attained on account of its delightful fragrance, beautiful colour, noble form, rigid erect stems, and vigorous growth."

Mr. Fred Howard, of Messrs. Howard & Smith, Los Angeles, writes as follows:—"I think Dame Edith Helen a top-notch, and there will be a tremendous sale for it. I am firmly of opinion that Dame Edith Helen is one of the finest H.T. roses which has ever been introduced. It has a grand scent, splendid shape, in fact, all the earmarks of a very fine rose."

The raiser's description is as follows:—"The colour is pure glowing pink, a self colour throughout, from when the bud opens till the petals fall the shade changes hardly at all. The bloom, which is carried on a rigid erect stem, is very large and full, of perfect spiral form, and opens well in all weather. It possesses the true old rose scent in the very highest degree.

"The foliage, which is abundant, is bright bronze in the young stage, changing with age to natural green, and is both mildew and black spot resistant. The growth is thoroughly hardy, very vigorous, of upright free branching habit, producing blooms freely. As a garden, bedding, or exhibition rose this magnificent and distinct variety will have few equals, and we recommend it with the utmost confidence."

Awarded Gold Medal, Royal Show, England; Award of Merit, R.H.S., London; Certificate of Merit, N.R.S.

Price: Standards, 2/6 each; Dwarf Worked, 1/9 each.

Be sure and get this early and be amongst the fortunate owners of this wonderful rose.

Our "Reminder" is printed Monthly and available to all our Customers without charge. Ask us to send you a copy.

NEW CLIMBING ROSE.

"COUNTESS OF STRADBROKE."

(H.T. Alister Clark, 1928.)

A vigorous growing, free blooming climbing rose of exceptional merit and worthy in every respect of a position beside varieties like Black Boy and Miss Marion Manifold. The flowers are large, full (averaging 40 petals), and of good shape, while in addition they possess a full, rich fragrance of the sweet or

damask type. The colour is a rich dark velvety crimson of a particularly vivid shade, and this brilliancy is maintained for a long period. It is only on rare occasions that any trace of blueing is evident, and in respect of colour this variety is quite on a par with Lord Charlemont and Etoile de Hollande. As an extra quality this variety has lovely foliage, and the young shoots are a picture, the reddish brown leaves harmonising beautifully with the dark green of the older growth.

This variety is a credit to Australian rose growing, and it is sent out with every confidence as a particularly fine novelty.

Price, 3/6 each.

TESTIMONIALS.

Snowtown, August 1, 1928.

"I received the case of plants you sent me, and must say they arrived in splendid condition; they were well packed, in fact, I was more than satisfied. I am enclosing cheque £6 4s. 6d. in payment."—E.G.

Camperdown, Victoria, February 24, 1928.

"The roses I had from you last year have done so wonderfully well, I am anxious to have some others, and enclose list to be sent when ready."—P.L.S.

Broken Hill, July 2, 1928.

"I received roses and seedlings in excellent condition, thanks to the able manner in which they were packed."—A.T.H.

Lameroo.

"I might mention that I achieved something out of the common with your water melon seeds. The Volga variety—I had 24 melons on one vine averaging about 20 lbs. each, realising 480 lbs. of water melon at 2d. per lb.—a return of £4. I have these facts displayed on my store room shop which has caused quite a lot of interest. These melons were grown without any watering or super, on the side of a moist sandhill in the desert country. Your name has been attached to the advertisement, 'Grown from Lasscock's Seeds.' "

J.G.S.

**TWO FINE ROSES WHICH SHOULD BE IN
EVERY GARDEN.**

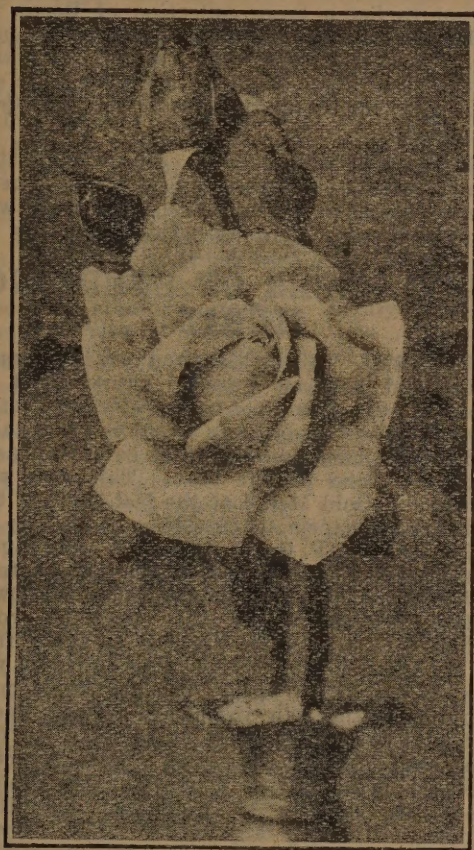

LORRAINE LEE.

This rose has proved itself a wonderful variety to flower throughout the season, and has given splendid results as a winter bloomer. Its glorious colouring is distinctive and its lasting qualities in water are good; when the light shines on it at night in a room it is glorious. The colour is described as a warm, rosy apricot pink with a flush of salmon. This rose will flower from late autumn onwards through the winter, which makes it at once very valuable and much sought after. To obtain satisfactory winter flowering it is best to prune it back fairly well in March and let it make new growth which will produce fine flowers when no other roses are available. The winter flowers are the best as it is in best form then, and it requires to be treated as a winter bloomer and not pruned in June and July as other roses. If these instructions are carried out, and the roses are cut with a fair stem when out, a continuance of fresh growth will be made during the season, with very fine blooms. Too much cannot be said about this glorious rose. It should be grown in masses and does best as a bush rose, making much stronger growth than as a standard. Price: Standards, 2s. 6d. each, 27s. 6d. dozen; Dwarfs, 1s. 9d. each, 18s. dozen.

SHOT SILK.

Another beautiful rose of great merit. It caused quite a sensation in England, and reported sales have been enormous. Its colour is a bright cherry colour overshot with salmon orange and flushed rose, deeply veined clear buttercup yellow base. Its growth is vigorous and free branching. A continuous bloomer, giving well-formed fairly full blooms. We have several thousand of this fine rose to offer, and thoroughly recommend it. Price: Standards, 2s. 6d. each, 27s. 6d. dozen; Dwarfs, 1s. 9d. each, 18s. dozen.

For Better Gardens and Best Results.

THE NEW ROSE,
"GOLDEN DAWN"

See description on next page.

ROSES.

Our stock of roses is this season the largest we have ever had the pleasure to offer, numbering well over 150,000 plants. These are remarkably strong and healthy, and embrace the finest sorts available. Our aim is not to list a large collection of Roses, but to bring the varieties grown down to the lowest possible number. To enable those who are not familiar with the different varieties of special merit we have set out in larger type (capitals) those sorts that are specially recommended.

SPECIAL NOTICE.—Unless otherwise instructed we invariably send out Roses as Standards. Customers will greatly oblige us when ordering by stating whether they require Dwarfs (bush form) or Standards.

NEW ROSES OF STERLING MERIT.

EDITH CLARK. This brilliant red rose is of bushy habit and compact growth; every shoot is crowned with flowers of beautifully imbricated form, and as the dazzling colour is practically fadeless it must prove a great gain both as a cut flower and on the bush. This rose was awarded a Gold Medal at the last show of the N.R.S. of Victoria. 3/6 each

GOLDEN DAWN (P. Grant, 1928). A very vigorous growing seedling raised from *Elegante x Ethel Somerset*. The buds are rich sunflower yellow heavily flushed with deep old rose. When open the petals disclose an inner face of sunflower yellow, which tones to lemon yellow as the flower ages. The growth is most vigorous with clean distinctive foliage, and a splendid branching habit so essential to profuse and continuous blooming. Though recommended primarily as a garden rose Golden Dawn is capable of producing exhibition blooms of a very high order. The average number of petals is 45 while the blooms are richly tea scented. All plants of this variety are sold under the condition that they are for Australian and New Zealand use only, and must not be directly or indirectly forwarded to either Europe or America. Price 5/- each. (Dwarf worked only). H T

PINK HADLEY (G. Knight, 1928). A promising sport from the old favourite, but producing blooms of a carmine pink shade, deepening considerably in cool weather. The growth is even stronger than the parent, while fragrance and blooming are identical with the old variety. Price 3s. 6d. each. (Dwarf worked only) H T

CLB. HADLEY (Teschendorf, 1927). From two distinct sources vigorous climbing sports of this popular variety have been imported, and as a result, the list of first class red climbers has been greatly improved. The flowers are identical to the parent in rich crimson colour and sweet fragrance, while the even climbing habit shows the sport has been firmly fixed and may be depended upon to give satisfaction in respect of climbing growth. Highly recommended. Price 5/- each. H T

CLB. RADIANCE (H. J. Catt, 1928). In so many countries of the world "Radiance" is the most popular garden rose, and now a real climbing sport is in commerce, we feel sure this new variety will become equally popular. Very vigorous grower. In all other respects like its parent, producing carmine pink, sweetly scented blooms in great profusion. 3/6 each H T

CLB. RED RADIANCE (Pacific Rose Company, 1927). Last year two distinct climbing sports of Radiance were offered, and it seems strange that the season now is offering two sports of Red Radiance from widely separated sources. The colour is a cerise red which is very telling under artificial light, and particularly good in Autumn and Winter. A vigorous climbing sport will be very welcome where the Radiance family are popular, as it supplies quite a new colour in climbing roses. Price 5/- each. H T

CLB. ROSE MARIE (Pacific Rose Company, 1926) Nothing is known as to the reason why a dwarf growing rose should suddenly change its habit of growth and produce vigorous climbing canes, but it is proved beyond doubt that these sports invariably produce better blooms than the parent bush variety. A vigorous climbing

sport of Rose Marie is, therefore, one of the most valuable acquisitions for many years. In addition to its colour being quite new in climbers, the shape of the blooms and rich sweet fragrance will ensure it a place in the very front rank of climbers. The growth is most vigorous, and the clean mildew-proof foliage adds still another argument for its inclusion in every order for high class climbing roses. Highly recommended. Price 5/- each. H T

ROSES.

GENERAL LIST OF SELECTED VARIETIES.

PRICES (except where otherwise marked).

Standards and Half-Standards, 2s. 6d. each; 27s. 6d. per dozen.

Climbing Roses, 1s. 9d. each; 18s. per dozen.

Dwarf Budded and Bush Roses, 1s. 9d. each; 18s. per dozen.

N.B.—Nothing less than one dozen supplied at dozen rates.

ADMIRAL WARD—Crimson red, shaded fiery red and purple H T

ANGELE PERNET (Pernet Ducher)—Hardy and vigorous, nice shiny bronze green foliage; colour very distinct. Vivid orange yellow, shaded fiery red, deep reddish apricot, outside of petals golden yellow. A lovely colour. Blooms are semi-double Per.

ANNIE LAURIE—Flesh pink, edges deeper golden yellow, base extending a third of the petal, large cupped, very double. Bud large, long pointed, borne on long, strong stem. Growth vigorous, upright, bushy, with few thorns. Good glossy green foliage, disease resistant, and continuous bloomer H T

ANTOINE REVOIRE—Rosy flesh; one of the best H T

BELLE SIEBRICHT—Bright rose pink. One of the best pink roses H T

Betty Uprichard—The inner face of petal is delicate salmon pink to carmine, while the outer or reverse of petal is glowing carmine with coppery sheen and a suffusion of orange . . . H T

For Better Gardens and Best Results.

- BLOOMFIELD PROGRESS**—Very fragrant, solid, crimson flowers somewhat darker than General McArthur H T
- Borderer** (Polyantha)—See Polyanthus Roses.
- Captain F. S. Harvey Cant**—Rich salmon pink, faintly veined with scarlet and suffused with yellow; flowers large, with high pointed centre; good H T
- Captain F. Bald**—A continuous bloomer. Fine in autumn; scarlet crimson, with velvety black sheen H T
- Carine**—Orange carmine to buff and creamy salmon H T
- Cecile Brunner** (Polyantha)—See Polyanthus Roses.
- Chameleon**—A beautiful rose of glorious colouring. Flame, edged cerise H T
- CHARLES K. DOUGLAS**—A flaming scarlet, flushed velvety crimson. Sweetly scented, full flowers, fine form H T
- Chateau de Clos Vougeot**—Velvety scarlet, shaded crimson. Poor grower, but a beautiful rose. The climbing sport does much better and is well worth growing H T
- Chrissie Mackellar**—Carmine, changing to orange pink as the semi-double flowers develop H T
- Cloth of Gold**—Sulphur yellow. Should only be grown as a Climber N
- CLARICE GOODACRE**—Chrome shaded white, erect blooms, good foliage H T
- COLONEL OSWALD FITZGERALD**—Blood red, velvet crimson, free flowering H T
- Columbia**—A delightful shade of rose pink, which deepens as the flower ages. Strong grower, free flowering, good foliage, blooms fragrant H T
- Constance**—Long orange yellow bud, streaked with crimson; large; full, globular flower of beautiful yellow cadmium colouring, passing to golden yellow Hybrid Austrian Briar
- Countess of Gosford**—Salmon-pink, the base of petals suffused saffron-yellow H T
- Colleen**—Rose, shaded pink, with deeper rose-crimson veining on a distinct yellow ground; flowers full, with high-pointed bud H T
- CORAL CLUSTER** (Polyantha)—See Polyanthus Roses.
- Countess Clanwillian**—Colour delicate peach pink at the base of petals, heavily edged with deep cherry-red H T

- Countess of Shaftsbury—Silvery carmine, mottled and flushed pale shell-pink at edges of petals. Good exhibition rose H T
- Covent Garden—Vigorous, erect growth, flowers large, colour a deep rich red H T
- Crimson Emblem—Glowing crimson; very sweetly scented H T
- C. V. HAWORTH—Intense black-scarlet with crimson pile. The blooms are of good size and freely produced H T
- Cynthia Forde—Deep, brilliant rosy pink, shading on the back of the petals to light rosy pink; flowers large and full, sweetly scented . . . H T
- Duchess of Westminster—Dainty clear rose-madder; vigorous and free flowering H T
- DUCHESS OF YORK—Strong, vigorous, free branching growth, with handsome light green foliage. Flowers large, very full, and of fine form. Colour in young stage deep golden yellow, with tangerine centre, deepening as the flower ages to orange tangerine H T
- Earl Haigh—Deep reddish crimson that does not fade, flowers large and good substance. The growth is vigorous and good habit, with dark green foliage; sweetly perfumed . . . H T
- Edgar M. Burnett—Very large full flowers of fine shape and form, colour flesh tinted rose . . . H T
- EDITH CLARK—See New Roses.
- EDWARD MAWLEY—Colour deep rich velvety crimson H T
- Elegante—Long sulphur-yellow bud, large, full, and globular flower, cream-yellow colour . . . H T
- Ellen Poulsen (Polyantha)—See Polyanthus Roses.
- Emma Wright—Colour pure orange. A very attractive bedding variety H T
- Ethel Somerset—Shrimp pink, edges of petal deep flesh coral pink; a lovely shade of colour. Flowers large and full and high pointed centre H T
- ETOILE DE HOLLANDE—Bright dark red, erect growth and floriferous; very sweetly scented H T
- FRAU KARL DRUSCHKI (Snow Queen)—Snowy white, fine in bud. A beautiful rose H P
- Frau Lilla Rautenstrauch—Coppery-orange buds, open flowers, rosy flesh shaded reddish orange H T
- FRED. J. HARRISON—Cardinal red colour, suffused with crimson and splashed with blackish crimson towards the edge of the petals. Very sweetly scented H T

For Better Gardens and Best Results.

- GENERAL MACARTHUR**—Flowers rich crimson, shaded scarlet. One of the best deep bright roses H T
- GEORGE C. WARD**—Glowing orange-vermilion; flowers large, full, perfect form H T
- George Dickson**—Velvety black crimson, back of petals heavily veined with deep pure crimson maroon H T
- Georges Schwartz**—Bright deep canary-yellow; one of the best of its colour T
- GOLDEN DAWN** (H T)—See New Roses.
- GOLDEN EMBLEM**—A rich golden yellow, full fine form; good, glossy green foliage. A remarkably fine rose H T
- Gorgeous**—Deep orange yellow, flushed copper, large and full H T
- GOLDEN OPHELIA**—A seedling from Ophelia. Flower compact, opening in perfect form. Colour, golden yellow centre, paling at the outer petals H T
- GRUSS AN TEPLITZ**—Bright crimson, with fiery red centre; always in flower H T
- HADLEY**—An American Rose of great merit; deep, rich, velvety crimson, shaded magenta H T
- HAWLMARK CRIMSON**—Intense crimson, veined maroon; becomes scarlet as the semi-double blooms develop. A delightful decorative variety H T
- Hawlmark Scarlet**—A very distinct and beautiful rose. The colour is a brilliant scarlet, growth vigorous, flowering freely. Recommended . . H T
- HOOSIER BEAUTY**—Glorious scarlet-crimson, of great fullness and substance, long, stout stems, and deliciously perfumed; very free growing, and blooms continuously H T
- Hugo Roller**—Rich lemon-yellow, petals edged and suffused crimson; free T
- I. ZINGARA** (Per.)—A remarkable bit of colour, orange and scarlet; semi-double, and sweetly-scented flowers; a good decorative.
- Independence Day**—Flame-like tints overlaying bright apricot; a free-flowering bedding rose; erect stems. Mildew proof H T
- Isobel**—A single rose of coppery pink colour, centre pure yellow zone; showy and free . . H T
- IVY MAY**—Pretty rose pink, running to amber at the base of petals, flushed with gold on the outside of the petals and at the edges; the colour glows and sparkles and does not fade; a

- distinct colour of great beauty; charming long buds opening to well-shaped flowers H T
- JOHN C. M. MENSING**—A distinct sport from "Ophelia," being a deep bright rose; habit and other characteristics as the parent; a very fine variety H T
- John Davison**—Deep rich crimson, shaded velvety crimson; a perpetual bloomer; large blooms . . H T
- JOSEPH HILL**—Salmon pink, shaded yellow, outside petals coppery pink, full, good shape; long buds H T
- J. J. L. Mock**—The colour is silvery pink on the inside of petals, with deep imperial pink exterior H T
- KAISERIN AUGUSTA VICTORIA**—Cream, slightly shaded lemon, deeper in centre . . . H T
- Kenigen Carola**—Extra large, satiny, rose-coloured flowers H T
- K. OF K.**—Intense scarlet, huge solid petals, vigorous and branching. Semi-double . . . H T
- LADY ASHTOWN**—Bright china pink; very free H T
- LADY ALICE STANLEY**—Deep coral rose on outside; inside pale flesh; large, full, and fragrant H T
- LADY BATTERSEA**—Bud long and pointed, beautiful cherry crimson, with orange shade . . . H T
- Lady Dixon Hartland**—Colour deep salmon in centre, shading to pale pink on the outer petals, long pointed flower, sweetly scented . . H T
- Lady Greenhall**—Intense saffron-orange on a deep cream-white ground, suffused delicate coppery shell-pink; a charming and free-flowering rose; good foliage; erect stem H T
- LADY HELEN MAGLONA**—The bud and young flowers are bright crimson red, with black markings; this colour lightens with age to a scarlet red, being more pronounced towards the centre of the bloom, and is retained till the petals fall H T
- LADY HILLINGDON**—Orange-yellow; long buds, half-full flowers; free blooming and attractive H T
- LADY MARGARET STEWART**—In the young stage the flower is a deep sunflower yellow, heavily splashed and veined with orange scarlet, the reverse of the petals being deeply marked with carmine; as the bloom develops these shades intermingle, forming in the fully-developed flower a beautiful cadmium orange effect; the bud is long and pointed, opening to

For Better Gardens and Best Results.

- a very full flower of pleasing decorative form;
it is vigorous, and has an upright bushy habit H T
- LADY MAUREEN STEWART**—Velvety black, scarlet, cerise, shell-shapel petals whose reflex is solid, pure orange maroon without veining. An excellent bloom, ideal shape, brilliant non-fading colour, with heavy musk rose odour . . . H T
- LADY ROBERTS**—Rich apricot, base of petals coppery red; edges shaded orange T
- LADY WORTHINGTON EVANS**—The colour is glowing blackish crimson; the petals, which are of a great substance, have a wonderfully finished surface of velvety smoothness and covered with a shining "bloom." The scent is strong wild rose H T
- LA FRANCE**—Beautiful silvery rose; large and full and free flowering; sweetly scented . . . H T
- LAURENT CARL**—Brilliant velvety carmine; large perfect form, not too full; growth vigorous H T
- Lena**—A grand garden rose; colour, glowing apricot, the edges of the petals a primrose yellow as the flower ages; buds long and perfect T
- Lilian Moore**—Deep Indian yellow, large and full, perfect camelia shape. Buds long and pointed H T
- LORD CHARLEMONT**—Free flowering, perfectly shaped; long pointed flowers of clear crimson, deepening to carmine crimson; large, full flowers. Highly recommended H T
- LORD LAMBOURNE**—Deep buttercup yellow, each and every petal being heavily margined all round carmine scarlet like "Sunstar"; flowers good shape, large and full. The scarlet edge gives the flowers when fully open a wonderful appearance Per.
- LOS ANGELES**—A luminous pink, shaded at base of petals with translucent gold; perfumed and exquisite H T
- LYON ROSE**—Shrimp pink; centre coral red or salmon, shaded chrome-yellow; large and full H T
- Mabel Drew**—Deep cream passing to canary-yellow as the blooms develop; perfumed; good growth H T
- MADAME ABEL CHATENAY**—Carmine pink shaded vermilion and salmon, very free flowering H T

- MABEL MORSE**—Free habit of growth; large, full, well-formed flowers continuously produced. Colour clear bright yellow without shading, free from mildew, and sweetly scented. Gold Medal, N.R.S. H T
- MADAME BUTTERFLY**—A glorious sport of Ophelia, said to be freer in growth and intensified in colour than its parent. Flowers freely produced and deliciously fragrant. A harmony of bright pink, apricot and gold . . H T
- MADAME EDOUARD HERRIOT**—Superb coloring, coral red, shaded with yellow and bright rosy scarlet, passing to prawn red, a brighter rose of the "Lyon Rose" type H T
- MADAME J. BOUCHE**—Salmon-white, centre shaded rose, flowers large, full, and perfectly formed H T
- MADAME JULES GROLEZ**—Satiny china rose, very bright, large, and full, always in bloom . . H T
- MADAME SECOND WEBER**—Salmon pink, very large full flowers; splendid habit of growth . . H T
- Madame Turbat (Polyantha)**—See Polyanthus Roses.
- MAMAN COCHET**—Flesh-coloured rose, shaded with carmine and salmon yellow. A splendid rose T.
- MARGARET DICKSON HAMMILL**—Straw-coloured, edged and flushed delicate carmine on back petals, large blooms, free flowering, fine show and decorative H T
- Marie Adelaide**—Deep orange yellow; keeps its colour; good form, erect stems; vigorous and free flowering H T.
- MARY PICKFORD**—This variety was picked out as the best of a large batch of seedlings in order that it might be given the name of the celebrated movie star. The blooms are rich yellow, with reddish shading in the bud stage. Recommended as a very good rose H T
- Merville Des Rouges (Polyantha)**—See Polyanthus Roses.
- Miss Alice de Rothschild**—Rich deep citron yellow, deliciously fragrant, free blooming, growth vigorous and erect T
- MISS EDITH CAVELL (Polyantha)**—See Polyantha Roses.
- Modesty**—Colour pearly cream, flushed rose . . . H T
- Molly Bligh**—Blooms large, exquisite musk rose perfume; colour deep maddery rose H T

For Better Gardens and Best Results.

- MOLLY SHARMAN CRAWFORD**—A distinct and beautiful pure white, free flowering T
- MRS. AARON WARD**—Indian yellow, large and full H T
- Mrs. A. R. Waddell**—Long buds of a reddish-salmon tone; good grower, producing a quantity of beautiful buds H T
- Mrs. Beckwith**—Vigorous growth, branching habit, long buds, medium size, colour buttercup yellow. A very fine rose, showing great promise Per.
- MRS. BRYCE ALLEN**—Solid Matte carmine rose; blooms are borne on erect flower stalks; a very highly perfumed rose of great beauty . . H T
- MRS. CHARLES RUSSELL**—Rosy Carmine, with rosy scarlet centre; large, full fine form, growth vigorous and free branching H T
- Mrs. C. V. Haworth**—A refined rose, colour cinnamon apricot, developing into biscuit buff, with a delicate cerise rose sheen on the reflex of the petals. The magnolia-like guard petals are flamed rose H T
- MRS. DAVID MCKEE**—Creamy yellow, flowers large and full H T
- Mrs. Dunlop Best**—Reddish apricot; base of petals coppery yellow; nicely perfumed.
- Mrs. Edward Mawley**—Carmine pink, shaded salmon T
- Mrs. Foley Hobbs**—Colour delicate ivory white faintly tinged with clear pink on edge of petals T
- MRS. GEORGE SHAWYER**—Clear rose pink, flowers large and full, good strong stems . . H T
- MRS. H. R. DARLINGTON**—A good all-round garden and exhibition rose, very free and well formed; colour creamy yellow, sweetly perfumed and free growth H T
- Mrs. H. Brocklebank**—Creamy white to yellow, with a delicate pink flush, free flowering . . H T
- MRS. H. STEVENS**—White; the petals are of great depth and substance; a free grower and perpetual bloomer T
- Mrs. R. D. McClure**—Vigorous, free branching, large flowers of exquisite form, colour brilliant glistening salmon pink H T
- Mrs. Redford**—Colour, pale apricot orange . . . H T
- Mrs. Theodore Roosevelt**—Creamy white, rose-coloured centre; most attractive and reliable H T

- Mrs. W. C. Miller—Soft pearly blush, shaded salmon; outside of petals clear vermilion rose; large and full; growth vigorous H T
- Old Gold—Vivid reddish orange, with rich coppery red and apricot shadings, dark coppery foliage; continuous flowerer H T
- Ophelia—Salmon flesh, vigorous; perfect shape, sweetly scented. Fine in Autumn H T
- Orleans Rose (Polyantha)—See Polyanthus Roses.
- PINK PEARL—Colour bright rose pink, shaded with a salmon base; handsome full flowers, sweetly scented; very free flowerer H T
- Perle D'Or (Polyantha)—See Polyanthus Roses.
- Pilgrim—Silvery pink with outside of petals clear rose pink. Splendid shape and full, with delightful tea fragrance. Mildew proof H T
- PINK HADLEY (H T)—See New Roses.
- Prince Charming—Colour deep reddish copper, with old gold base; beautiful and very attractive; free flowering H T
- Queen Alexandra—Vermilion, with old gold reverse. Quite a startling colour in roses.
- Queen Mary—Deep yellow, heavily shaded chrome; beautiful buds H T
- Radiance—Brilliant carmine, shaded salmon and coppery red H T
- Red Letter Day—A beautiful semi-double rose, velvety, brilliant, glowing scarlet-crimson buds H T
- Red Radiance—A red "sport" from the popular variety Radiance. Free flowering. Fine for bedding H T
- REV. F. PAGE ROBERTS—Blooms large, full, and well formed, of a beautiful rich "Marechal Neil" colour, with buff markings on the reverse of petals. Fine for exhibition and decorative purposes H T
- Rhea Reed—Free-flowering variety, possesses many good qualities; the flowers produced on long shoots and resist mildew, colour bright red H T
- Rose D'Evian—Buds magenta, open flowers carmine, large and full T
- ROSE MARIE—Long buds of perfect shape, opening to full flowers of an even shade of rose pink. It is particularly free flowering and possessing mildew-proof foliage and good growth H T
- Safrano—Deep apricot, changing to buff T

- SENSATION**—Flowers scarlet crimson, with maroon markings, very large double, and lasting, moderate fragrance; buds very large, long pointed, borne singly on long stems. Awarded Gold Medal of the American Rose Society at the important National Flower Show held at Cleveland, U.S.A. H T
- Severine**—Vigorous grower, erect branching habit; bronze-green foliage; large flower, beautiful coral-red, fading to prawn-red when fully expanded H T
- Sou. de H. A. Verschuren**—Flowers cadmium yellow, passing to deeper yellow when opening, very large and full, of good form; shows promise of being one of our best roses H T
- SOUVENIR DE CLAUDIUS PERNET**—A very promising rose of good growth, giving large and full bloom of a delightful-sunflower yellow shade that does not fade.
- SOUV. DE GEORGES PERNET**—Flower of beautiful Orient red colour, the end of petals cochineal carmine, shaded with yellow; very large, full, and globular, oval bud carried on erect stem. A vigorous grower of branching habit, with few long thorns and bronze-green foliage. Very good.
- Souvenir de Marie De Zayas**—Very large, full and erect, perfect form; vivid carmine veined deeper; very free and fragrant H T
- Souvenir de Stella Gray**—Deep orange with splashes of yellow apricot, salmon, and carmine; a good bud rose T
- Sovereign**—Flowers medium size, freely produced and of a deep yellow in the bud, opening to deep golden yellow. Very effective colouring Per.
- SUNBURST**—Orange-yellow, with deeper centre; fine long-pointed buds carried on stiff stems; a magnificent garden rose H T
- SUNNY SOUTH**—Colour pink, flushed carmine on a yellow base; good, strong habit of growth H T
- Sunstar**—Deep orange and yellow edge, veined and splashed crimson and vermilion. Colours vary in tone and intensity as the bloom develops. A good decorative, but a poor grower H T

Lasscock's Nurseries, Lockleys, South Australia.

- THE BRIDE**—White, delicately tinged with rose.
One of the best garden roses T
- Tip Top (Polyantha)**—See Polyanthus Roses.
- The General**—Colour blood red, flushed orange,
flowers large, pointed, globular, fragrant,
damask perfume, flowering continuously late
in season H T
- Victory**—Glowing scarlet, blooms long semi-
double of good form, growth free H T
- Warrior**—Long buds, blood red, opening to vivid
scarlet crimson H T
- W. G. Gaunt**—Brilliant velvety vermilion, reflex
grand petals, tipped scarlet, crimson-maroon
on reverse H T
- WHITE ENSIGN**—Colour white, flushed delicate
cream at very base of petals; flowers are
medium sized, full, and well shaped, carried
perfectly upright on long stems; very free
flowering, and blooms last a long time; ideal
strong bushy garden and bedding habit H T
- WHITE MAMAN COCHET**—Creamy white, outer
petals edged and tinged with rose; one of the
very best T S
- William Shean**—A lovely pure pink rose, immense
size H T
- Yvonne Vacherot**—Buds long-pointed; colour por-
celain white, suffused delicate soft pink; good
for exhibition H T
- Yves Druhen**—Growth vigorous and branching,
flowers fairly full, colour dark velvety red,
highly perfumed H T

Port Pirie, 8/5/28.

"I find your Monthly Reminder very interesting and
useful to the man who takes an interest in his home
garden, and I can assure you it will be appreciated."
F.A.G.

Clare, June 17th, 1928.

"Will you please post on 1 oz. of your Early Green-
leaf Cauliflower seed? I have grown your Early
Greenleaf for the last two years, and have proved them
all that you say they are."

CLIMBING ROSES.

- AMERICAN PILLAR** (Rambler)—Clusters of single pink flowers with yellow stamens P
Banksian Double White—Clusters.
Banksian Double Yellow—Clusters.
BARDOU JOB—Bright crimson, shaded black; a fine pillar rose H T
Beauty of Glazenwood (Fortune's Yellow)—Yellow, shaded bronzy fawn T
BLACK BOY—Magnificent climbing variety. Deep crimson shaded with blackish maroon, overlaying fiery scarlet, giving a rich luminous effect, and it is sweetly scented. A most distinct rose.
CLIMBING BELLE SIEBRECHT—A vigorous climbing form of the well-known variety of the same name; rosy pink, blooms large . . . H.T
Climbing Caroline Testout—Bright salmon pink; large and full H T
Climbing Cecil Brunner—Blush, centre salmon pink; a good buttonhole rose P
CLIMBING CHATEAU DE CLOS VOUGEOT—A splendid climbing form of this very distinct variety, which is the darkest crimson H.T.
 rose grown H T
Climbing Comtesse De La Barthe—Rosy flesh; strong grower, and free flowering T
Climbing Devoniensis—Creamy white, with blush centre; very vigorous, free flowering T
Climbing Frau Carl Druschki—A vigorous sport from the well-known white H P
CLIMBING GENERAL McARTHUR—A Sport from the well-known and popular rich crimson rose H T
Climbing Georges Schwartz—The most effective yellow climber in existence. A vigorous grower T
CLIMBING GOLDEN OPHELIA—A fine climbing sport of the pretty dwarf variety; the flowers are perfect in shape, and will prove a welcome addition to the yellow flowering climbing varieties H T

- CLIMBING HADLEY (H T)**—See New Roses.
- CLIMBING HOOSIER BEAUTY**—A vigorous climbing sport of the popular dwarf of this name. It is identical as regards its rich crimson bloom, and with its delicious fragrance is sure to be well sought after.
- Climbing Lady Hillingdon**—Long buds of deep orange-yellow. A free bloomer T
- CLIMBING LAURENT CARL**—A fine sport, brilliant velvety carmine, large, and of perfect form.
- Climbing Liberty**—Brilliant velvety crimson . . . H T
- CLIMBING LOS ANGELES**—A climbing sport that is sure to have instant support, as flowers are generally of better quality on the climbing sports, and Los Angeles, being so well known, it needs no further recommendation.
- CLIMBING LYON ROSE**—A climbing sport of the dwarf variety which will probably prove less liable to die back than the parent.
- Climbing Madame Jules Grolez**—True stock of this very fine and popular rose; growth very strong.
- CLIMBING MADAME ABEL CHATENAY**—A true climbing sport of the favourite rose . . H T
- CLIMBING MADAME E. HERRIOT**—A strong climbing sport from this well-known rose, having its beautiful colouring and of a true climbing habit H T
- CLIMBING MADAME SEGOND WEBER**—A strong sport, producing flowers identical with the dwarf variety. A first-class climber . . . H T
- CLIMBING MAMAN COCHET**—Flesh-coloured rose, shaded with carmine and salmon-yellow, large and full, fine long buds; a charming variety T
- CLIMBING MRS. AARON WARD**—Another fine sport of true climbing habit. Indian yellow, large and full, and very fine flowering. A colour wanted amongst climbers H T
- CLIMBING MRS. HERBERT STEVENS**—This sport from the well-known white rose should give much pleasure to growers T
- CLIMBING MRS. G. SHAWYER**—To the exhibitor the climbing sports are extremely valuable, as they invariably produce better blooms than the original dwarf parent. Mrs. G. Sawyer ranks as one of the very best show varieties.

For Better Gardens and Best Results.

- CLIMBING OPEHLIA**—Salmon flesh shaded rose. Vigorous grower, perfect blooms on lengthly stiff stems **H T**
- CLIMBING RADIANCE (H T)**—See New Roses.
- CLIMBING RED RADIANCE (H T)**—See New Roses.
- CLIMBING RICHMOND**—In all respects except growth identical with the normal type, and of true climbing character **H T**
- CLIMBING ROSE MARIE (H T)**—See New Roses.
- CLIMBING SUNBURST**—A particularly strong climbing sport. The flowers are even better than the dwarf grower, and the long shapely buds of deep yellow are its own recommendation **H T**
- CLIMBING SUNSTAR**—A very novel and valuable introduction, and one that will be greatly appreciated. Quite genuine climbing habit, and on account of its colour is sure to be very popular.
- CLIMBING WHITE MAMAN COCHET**—A sport from "Maman Cochet," with creamy white flowers, outer petals tinged with blush . . . **T**
- CLOTH OF GOLD**—Pale sulphur-yellow, deep centre, large and very vigorous **N**
- Crimson Rambler**—Bright crimson, produced in clusters **P**
- Dorothy Perkins**—Shell-pink, flowers borne in large clusters; strong climbing habit; foliage good **W**
- Emily Gray**—A new Climbing Rose of golden yellow colour raised by Dr. William. This is the finest yellow Wichuriana ever introduced **W**
- Fortuniana**—Pure white; known as the "Bridal Rose"; good for covering unsightly places or fences **Banksia**
- Golden Vision**—A seedling from "Marechal Neil," the old sweet-scented favourite. Bright foliage and golden yellow blooms, sweetly scented . . **T**
- Gruss an Tepnitz**—Brilliant cinnebar scarlet, shaded with fiery red; a very effective decorative rose of semi-climbing habit **H T**
- Gwen Nash**—Another first-class Climbing Rose of a beautiful shade of cyclamen pink, running down to a white base in the petals **H T**

Harbinger—Large single flowers of pure refined pink H T

Hauff (The Blue Rambler)—With bluish purple flowers, produced in clusters, and quite distinct from any existing Rambler; a strong climbing variety Mult

HIAWATHA—A fine single-flowered Wichuriana hybrid; flowers produced in long, trailing bunches; colour vivid, glowing crimson, with white eye W

ILE DE FRANCE—Flowers crimson red, with white centre, large, semi-double, produced on enormous trusses, most effective. Recommended as one of the best of this type . . . W

JESSIE CLARK—The colour is like "Senica Anemone," but the blooms are twice the size, and more like a very large Clematis; the plant is a vigorous climber.

KITTY KININMONTH—A brilliant Climbing rose, producing huge decorative flowers which are a bright carmine rose colour. This rose has enormous petals and is perfectly even in colour. Splendid green mildew-proof foliage . H T

LADY GAY—Bright glossy green foliage; rich rose-coloured cluster of flowers W

Lady Medallist—A vigorous Climbing Rose, large, full, perfectly-formed flowers, after the style of "La France" H T

LADY WATERLOW—Pale salmon-rose, edged with carmine, large semi-double flowers, very elegant; strong grower with good foliage . H T

Larmaque—White; free flowering, and vigorous . . N

Loretto—A Climbing or Pillar Rose of most distinct and beautiful colouring, suggesting crimson overlaid with carmine H T

MACARTNEY GRANDIFLORA—Large single white flowers, with beautiful shining foliage T

MADAME JULES GRAVEREAUX—Buff-white, shaded peach and yellow, very large, good shape; vigorous; a good Climbing Rose . . . T

Marechal Neil—Bright golden yellow, large and full N

For Better Gardens and Best Results.

- MISS MARION MANIFOLD**—Rich velvet scarlet, shaded with crimson, very large, full, and of good form; free and continuous bloomer; scented; a vigorous climber suitable for arches; pergolas, or pillars **H T**
- NORA CUNNINGHAM**—A vigorous climber, suitable for tripods, pillars, and fences. Colour, pure pink in spring; vivid in autumn **H T**
- PAUL'S SCARLET CLIMBER**—Vivid scarlet, shaded crimson, blooming for an unusual length of time for a Climbing Rose. Does not burn in the sun Hybrid Wichuriana
- Queen of Hearts**—A splendid Climbing Rose of a beautiful pink shade; free flowering, and good habit of growth **H T**
- RUBY RING**—A vigorous Climbing Rose, suitable for a pillar or hedge; it flowers in elegant sprays, and is very decorative; the centre is white, with a well-defined ruby edge; one of the prettiest and best roses **W**
- SCORCHER**—A decorative Climbing Rose of distinct colour; crimson carmine. Good grower, attractive rich green foliage, mildew-proof . . **H T**
- SINICA ANEMONE**—Very beautiful single-flowering, light silvery pink at edges, gradually deepening to bright rose at base **Mae**
- SOUVENIR DE LEONIE VIENNOT**—One of the most beautiful Climbing Roses; silvery rose, shading to carmine, base of petals canary-yellow, forming a lovely combination of colours; strong grower **T**
- White Dorothy Perkins**—Sport from "Dorothy Perkins," producing white or almost white flowers; a valuable acquisition **Per**
- William Alan Richardson**—Deep orange-yellow, edged white; showy and distinct **N**

S.A.T.

Lorgnon, Victoria.

"Last year I had wonderful results with the Cinerarias from your Nursery. Out of the 14 plants each one was different in colouring, and the bed made a splendid display, admired by all who saw it."

Mrs. O.E.R.

DWARF POLYANTHA ROSES.

These delightful little bunch-flowered roses, on account of their dwarfness and compact habit of growth, are very desirable both for bedding in masses or for edging purposes. They will provide a continuous display of bloom and may either be allowed to grow into large bushes or be kept dwarf by pruning. For edging purposes, hard pruning, of course, is necessary.

Price, 1s. 9d. each; 18s. per dozen.

Borderer—Pink shaded copper and amber; very free flowering.

Cecile Brunner—Blush, centre salmon pink. A favourite buttonhole rose.

CORAL CLUSTER—Rich coral pink; very pretty and distinct. A fine addition to this class.

Ellen Poulsen—Dark brilliant pink; free flowering and very pretty.

Madam Turbat—China rose, shaded clear peach after style of "Orleans," but much prettier as a border rose. Compact grower.

Merville des Rouges—A beautiful deep crimson; very dwarf. A fine variety for rose edging.

MISS EDITH CAVELL—Scarlet-crimson sport from Orleans, possessing all the parent's good qualities; a fine clear colour; a rose that promises well.

Orleans Rose—Brilliant rosy carmine with white centre, semi-double. Fine for bedding or for an edging. Always in flower.

Perle D'Or—Nankeen yellow, with orange centre. Small and full flower; fine for buttonholes.

Tip Top—Orange yellow shaded carmine. One of the prettiest of the Polyantha class. Makes a fine rose edging. Always in bloom.

White Orleans—Similar to Orleans in all respects except colour.

Our Reminder is printed Monthly and available to all
our Customers.

FRUIT TREES.

BRIEF NOTES ON PLANTING.

Preparation of the soil, some time before planting gives best results. Digging all over the plot where it is intended to grow trees is far better than taking out holes here and there, which, if the subsoil is stiff and clayey, are likely to become waterlogged in winter.

Remove the surface soil to a fair depth and then break up the lower soil with a pick until a depth of from 14 to 18 inches in all is loosened. Into the lower soil some well-decayed manure, say, three or four good shovelfuls, and a sprinkling of bonedust may be well worked, but no manure must come into direct contact with the roots of the tree at planting.

It is always advisable to place a stake to each tree, to which the main stems should be tied. Fix the stake before planting the tree. The distance between each tree should not be less than 16 feet; 20 feet between each tree would be better. The soil marks showing on the tree as it comes from the nursery should be a guide to the depth to which it should be planted.

Firmly tread the soil around the roots at planting time and give each tree a liberal watering.

FRUIT TREES.

APPLES.

Our stock of Fruit Trees this season are exceptionally strong, well-shaped, and rooted. Intending purchasers should inspect the Nurseries, Mellor Park, and see for themselves the fine lot of trees available.

PRICES.—Apples, Apricots, Almonds, Figs, Nectarines, Peaches, Pears, Plums, Prunes, and Quinces, 2s. each, 22s. 6d. per dozen assorted, £7 10s. per 100; six or more of one sort, 20s. dozen, £6 per 100. Nothing less than 100 supplied at 100 rates.

Beauty of Bath—Fruit medium size, roundish, beautifully striped and spotted with crimson in the sun; flesh yellowish, with a rich, spicy flavour. A valuable dessert apple. Summer.

Buncombe—Medium size. Regular bearer; dessert Late.

Lasscock's Nurseries, Lockleys, South Australia.

- Cleopatra**—Medium to large, oblong to conical, skin clear yellow, flesh whitish, juicy and rich; good dessert quality. Grown extensively in this State for export, and is undoubtedly one of the best we have for that purpose, as it succeeds over a wide range of country and is a consistent bearer. Winter.
- Cox's Orange Pippin**—Very handsome, medium size, good export apples; grand dessert of excellent flavour. Does well in special district.
- Delicious** (Syn. Chicago)—A beautiful dark red fruit; tree a strong vigorous grower; great cropper, and bears regularly and early; both tree and fruit are perfect models. The former has heavy, dark green foliage, strong and finely moulded limbs, adapted to bearing great weights of fruit, while the fruit itself does not burn with the sun. It can be picked as early as Jonathans, and will keep till October. Considered one of the best of all apples.
- Dunn's Seedling**—Fruit large, clear waxen yellow, with brownish red cheek; a good, solid, late-keeping cooking apple; also useful for dessert. Largely grown for export. Winter.
- Emperor Alexander**—One of the largest and most beautiful apples in cultivation; an excellent market variety; good cooking; fair dessert. Early Autumn.
- Five Crown** (London Pippin)—Fruit medium size, skin greenish yellow with brownish red cheek, good cooking or dessert. Does well in the cooler parts of the State. Fruit keeps well, and is good for export. Winter.
- Granny Smith**—A large and juicy apple of a greenish yellow colour, late, heavy bearer, and highly esteemed for export.
- Gravenstein**—Large, roundish, rather flat; skin pale yellow, streaked red on sunny side.
- Irish Peach**—Medium size, roundish, rather flat and angular at the crown; skin yellowish green, streaked and spotted with brownish red; flesh white, tender, juicy, and very highly flavoured. One of the very best early dessert apples.
- Jonathan**—An apple of great excellence; fruit medium size, roundish, conical, skin clear light yellow, almost covered with bright rich red, dark red where fully exposed; of fine dessert quality; an early bearer. Excellent for market or export. Winter.

For Better Gardens and Best Results.

- King David**—Colour dark red, with yellowish flesh; said to ripen before Jonathan. Tree hardy, vigorous grower; good cropper. Medium.
- Maiden's Blush**—Fruit medium to large, skin smooth, greenish yellow, with a beautiful red cheek; flesh white, tender, with a pleasant sub-acid flavour; good cooking or dessert. Autumn.
- Northern Spy**—Splendid dessert; blight proof. Late bearer.
- Prince Bismarck**—Fruit large to very large, flushed with red and streaked crimson; comes early into bearing, and bears heavy crops. A valuable kitchen variety. Autumn.
- Ribstone Pippin**—Medium size, greenish yellow, clouded with dull red on the sunny side; flesh yellow, with a rich aromatic flavour. Late Autumn.
- Rokewood**—Heavy yielder and one of the best keepers; good colour. Late.
- Rome Beauty**—Fruit large and handsome; skin yellow, shaded and striped with bright red; flesh yellowish, tender and juicy. A remarkably handsome fruit of good dessert quality; good exporter. Winter.
- Statesman**—Fruit large, bright golden, striped and shaded crimson; a good keeper; very prolific. Winter.
- Stone Pippin**—Fruit large, greenish yellow tinted with dull red; a very solid and late-keeping variety; kitchen. Winter.
- Strawberry Pippin**—Fruit large, yellow and deep red; a very handsome apple; tree a very strong grower; the fruit will keep till August. Winter.
- Scarlet Nonpareil**—Excellent dessert apple, very free bearer; one of the best keeping varieties. Late.
- Tasma (Democrat)**—A dark red all over; prolific bearer, good flavour, splendid keeper; dessert. This apple sells at high prices at the end of the apple season. Very late.
- Yates**—Good colour, trees very prolific; handsome dessert; requires plenty of moisture. Winter.
-

APRICOTS.

- Hemskirke**—Fruit large, resembling "Moorpark," and ripening about the same time; a first-class variety.
- Mansfield Seedling**—Very large, with flattened sides; skin pale yellow, with a few red dots; flavour good; tree a regular and good bearer. January.

Lasscock's Nurseries, Lockleys, South Australia.

- Moorpark** (Temple's)—Fruit large; skin yellowish green, brownish red on the sunny side; flesh bright orange, parts freely from the stone; the most popular variety for market, canning, or drying. End of December and early January.
- Newcastle Early**—Medium size, rich golden yellow with a red cheek; a regular bearer, ripening before "Oullin's"; requires to be heavily thinned. End of November.
- Oullin's Early**—A very heavy bearer. First week in December.
- Riverside**—Fruit large to very large, roundish oval, of best quality; skin yellowish green with a red cheek where exposed; tree a strong grower, with short-jointed wood and large foliage; a sure bearer of fine fruit, ripening a fortnight before "Moorpark." Middle December.
- Riverside Late**—Fruit large, with slightly flattened sides, flesh solid and good quality; a good bearer; ripening later than Robin's Imperial.
- Robin's Imperial**—Fruit medium to large, of good quality; does not commence to ripen till first week in January; a valuable late variety. January.
- Royal**—Medium, roundish oval; strong grower and most prolific; largely grown for drying. Medium.
- Tilton**—Fruit very large, rich apricot colour, high flavour, uniform ripening, productive; for drying and canning it is much superior to any of the older sorts. Late.
-

ALMONDS.

- Brandise**—The tree is a strong, upright grower; nuts large and sweet; soft shell. Price, 2s. each, 18s. doz.; £6 100.
- Californian Paper Shell**—Tree of spreading habit, strong grower, a heavy and regular bearer of the paper shell type; one of the best.
- Chellaston**—Tree extremely hardy, and great bearer. recommended as one of the best.
- Commercial**—Tree of very strong habit and distinct foliage, nut long and large, with a plump, sweet kernel; tree a regular and abundant bearer; soft shell.
- Hatch's Nonpareil**—A very fine almond, large kernel, and a very thin shell; the shell of this almond is the thinnest we know of, thus losing very little weight after being shelled.

For Better Gardens and Best Results.

- I.X.L.**—A good variety; large nuts, perfect shell. Shy bearer in some places.
- Jordan True**—A spread variety. Bears large nuts. Hard shell.
- Ne Plus Ultra**—Tree a rapid grower, and leaves are large. Produces nuts in bunches. Nuts large and long; fine flavour.
- Paper Shell**—Very good, easily broken between the fingers.
- Peerless**—It is without any doubt the prettiest dessert almond, being very smooth and well shaped, large and of fine flavour; shell easily broken between the fingers.
- White Nonpareil**—The tree is a strong grower, of spreading habit; nuts large; white shell; a far heavier bearer than the "Brandise."

CHERRIES.

Price, 2s. 6d. each; 27s. 6d. dozen.

- Belle d'Orleans**—Tender and juicy; red. Early.
- Bedford's Prolific**—Large, handsome, black, fine market sort. Medium.
- Bigarrean Twyford**—Pale yellow and red; first-class quality. Early.
- Black Bohemian**—A large black cherry, first-class for market. Medium.
- Early Lyons**—Very early; black.
- Florence**—Large, bright red, carries well; one of the most popular varieties. Late.
- Knight's Early Black**—Richly flavoured, large, heavy bearer. Early.
- May Duke**—Brownish black, large, heavy bearer. Early.
- St. Margaret**—Very large, black, flesh firm, very valuable.
- Werder's Early Black**—Large, black, fine flavour; heavy cropper.

FIGS.

- Black Ischia**—Large, sweet, and rich; skin deep purple.
- Capri (Roeding's)**—This fig should be planted at some distance from the Smyrna, so as to prevent an overcrowding of the wasps.
- Castle Kennedy**—Large, dark brown, tender, rich flavour. Ripens end of December.
- Grosse Verte**—Green; very large; rich and excellent. One of the best. Late.

Madeline—Small pale yellow, very rich, good bearer. Early.

Smyrna—The large drying fig of commerce; a splendid variety for growing in company with the Capri Fig. The Capri Fig should carry the wasp for purposes of cross fertilization to ensure the setting of the Smyrna Figs.

Turkey—Large, fine flavour, brown, with red flesh.

White Provence (White Genoa Sugar Fig)—One of the best. Ripe at Christmas.

NECTARINES.

Albert Victor—Fruit large; skin greenish white, with a carmine cheek; flesh greenish white, very juicy; ripe middle of January.

Byron (Rivers)—Orange; extra large, flavour rich, heavy cropper.

Early Rivers—Fruit very large; skin light yellow, marked with red in the shade, rich crimson in the sun. Early.

Goldmine—Fruit very large, roundish oval; colour bright bronzy red; a valuable late nectarine, ripening just before "Stanwick." Late. The best all-round variety.

Irrewarra—Above medium, good colour; nice flavour. Very early.

Lee's Seedling—Fruit large and brilliantly coloured; very rich flavour; commences to bear very early and is one of the best.

Lippeatt's Prolific—Fruit round, medium to large, dark red on greenish yellow ground. Flesh white. Prolific cropper.

Mrs. Dr. Chisholm—A medium sized, highly-coloured nectarine, very early, ripening with "Cardinal."

New Boy—Fruit large, skin creamy white, almost covered with brilliant crimson; flesh white, juicy, and sugary, and good flavour. One of the best. Medium to late.

Rivers' Cardinal—Fruit good, medium size, brilliant colour, exquisite distinct flavour; the best early nectarine, ripens from ten to fourteen days before 'Early Rivers.' Very early.

Stanwick—Large, nicely flavoured. Late.

PEACHES.

Alexander's Early—Above medium, highly coloured, splendid freestone. Early.

Briggs' Red May—Fruit large when well grown; skin whitish green in the shade; deep red in the sun;

flesh tender, juicy, and rich; one of the very best early varieties. Very early.

Early Crawford—Very large, oblong; skin rich golden yellow, with deep red cheek; flesh yellow, very rich and sugary; excellent market or canning, also one of the best for drying. Middle January.

Elberta—Fruit very large; skin a fine yellow, highly coloured with rich red; flesh firm, very fine grained with an abundance of rich juice; undoubtedly one of the best and most profitable in cultivation for market purposes. End January.

Finlayson's Seedling—Fruit large, almost round, well coloured and of first quality. Ripens with "Sea Eagle," and is one of the best late peaches. End of February.

Hale's Early—Fruit large, round; skin greenish white, nearly covered with dark rich red; flesh creamy white, juicy, melting, and well flavoured; a valuable peach, ripening just after the first early varieties. End of December.

High's Early Canada—Fruit large; skin yellowish white, with broken stripes and markings of crimson; flesh tender, rich, and melting; one of the handsomest and best of the very early varieties. December 10th to 20th.

J. H. Hale—One-third to one-half larger than Elberta; round uniform shape. Colour rich golden yellow, overlaid with carmine. Flesh solid, and merely with a texture of a cling, yet is a perfect freestone, without grain or stringiness. A splendid packer and unusually long keeper. Ripens five to seven days ahead of Elberta.

Lady Palmerstone—Medium to large, globular; skin greenish yellow, marbled and flushed with deep red; flesh yellow, tender, and juicy; it never fails to bear a crop, and is one of the best for market, canning, or drying. February 20th to March 6th.

Late Red Italian Cling—Fruit large and almost round, greenish skin, with a dark red cheek. Tree is a strong bearer.

Louis Grognet—Fruit very large; skin cream colour, with dark red cheek, often marked with red; flesh white, very melting and juicy; ripens just after "Hale's Early" and before "Mountain Rose." The tree is a good, strong grower, and bears heavily; this is a variety no market grower should be without, as it is undoubtedly the finest of its season.

- Mountain Rose**—Fruit large, skin whitish yellow in the shade, but covered with bright, rich red where exposed; flesh tender, melting, and rich; this is one of the best mid-season peaches, combining size, great beauty, and quality; commences to ripen about second week in January.
- Para Grove**—Raised from a cross between "Elberta" and a seedling; good colour, large, vigorous, and productive.
- Peregrin**—Hardy and productive mid-season variety; large and handsome fruit; richly flavoured, and parting readily from the stone.
- Phillips' Cling**—Fine large yellow cling; the fruit is ideal for canning, being medium to large size, even in outline, of good quality, very small stone; flesh clear yellow right to stone, without the least sign of red; ripens progressively, so that picking can be extended over 12 to 16 days; will certainly become one of the best canning sorts with a big preference by buyers owing to small stone and no red.
- Pullar's Cling**—A very large, highly coloured cling-stone peach, and preferred by canning factories. It is a good grower and heavy bearer.
- Royal George**—Medium to large; skin pale yellowish white, almost covered with red in the sun; flesh tender, melting, and juicy; a well-known mid-season variety, and one of the best for home use. Middle or end of January.
- Ruby Red**—Large, skin creamy white, almost covered with brilliant red; flesh white; very juicy, and melting. Cling.
- Salway**—Medium size; juicy, fine flavour; yellow. Very late.
- Sea Eagle**—Fruit large to very large; skin pale yellow, with a bright red cheek where exposed; a very heavy bearer and good market variety. Middle to end of February.
- Sneed**—Fruit medium size, oval; skin creamy white, with a delicate red cheek; ripens about ten days before "Red May," but is too soft and delicate to make a good market variety.
- Surecrop**—A sure and abundant cropper, fruit large and handsome; flesh white and melting, vigorous grower; very hardy. January 10th to 20th.
- Triumph**—The earliest yellow-flesh peach known; fruit large, round almost covered with deep red; a valuable variety, ripening immediately after "Red

For Better Gardens and Best Results.

May''; tree a strong, healthy grower, and prolific.
Third week in December.

Tuscan's Cling—The earliest fine cling variety, ripening with Early Crawford, very large yellow fruit, with a little red at the stone; tree vigorous grower and good cropper. Will be much sought after by canners owing to its earliness.

Wiggins—An early freestone of large size, and most highly coloured, ripening just after the first early sorts have finished; tree very hardy and prolific; valuable for market or home use. End of December.

A PEACH RIPENING CALENDAR.

Time of Ripening in Ordinary Seasons of some well-known varieties.

- Dec. 1—Sneed.
- Dec. 10—High's Early Canada.
- Dec. 10—Briggs' Red May.
- Dec. 14—Triumph.
- Dec. 26—Wiggins.
- Jan. 1—Hale's Early.
- Jan. 3—Ruby Red.
- Jan. 5—Louis Grognet.
- Jan. 14—Mountain Rose.
- Jan. 15—Surecrop.
- Jan. 18—Royal George.
- Jan. 20—Peregrine.
- Jan. 23—Early Crawford.
- Jan. 23—Tuscan's Cling.
- Jan. 25—J. H. Hale.
- Jan. 30—Elberta.
- Jan. 30—Elberta (Willow-leaved).
- Feb. 16—Sea Eagle.
- Feb. 16—Paragrove.
- Feb. 16—Finlayson's Seedling.
- Feb. 18—Lady Palmerston.
- Feb. 18—Salway.
- Mar. 5—Red Italian.

By reference to this list customers will be able to order and plant varieties to give fruit over a lengthy period.

Mt. Barker, December 7, 1928.

"Allow me to congratulate you on the new form of your Garden Reminder. It is splendid."—P.S.

DOUBLE-FLOWERING PEACHES.

2s. 6d. each.

Crimson—Flowers very bright crimson.

Pink—Bright pink colour.

White—Flowers pure white.

Mellor Park Crimson—See Novelty pages.

PLUMS AND PRUNES.

Angelina Burdett—Fruit above medium, roundish, dark purple, rich, juicy, and good for market or drying; the tree is a strong grower, and matured trees bear heavily. Early.

Clyman—Fruit large, skin dark purplish red when ripe; the fruit is three times as large as "Rivers' Prolific," and ripens early; tree a strong grower and enormously productive. Very early.

Coe's Golden Drop—Large, oval, yellow, juicy, rich, and excellent; good drying, preserving, or dessert. Late.

Diamond—Fruit very large, oval, skin black, covered with blue bloom, flesh yellow; a good preserving variety; tree a very heavy bearer. Mid-season.

Early New Orleans—Medium size, roundish oval, skin dark red, purple in the sun; good dessert or preserving; a first class market variety. Early.

Egg Plum—Fruit very large, oval, skin yellow, covered with thin, white bloom; good cooking or preserving; a constant and heavy bearer. Late.

Grand Duke—Fruit large, oval, deep purple, flesh yellow, firm, very rich and juicy; a very heavy cropper, and one of the best late plums known.

Green Gage—Fruit medium size, round, skin greenish yellow when fully ripe; one of the best-flavoured dessert plums known. January.

Jefferson—Fruit largest size, oval, skin yellow, with reddish cheeks where exposed to the sun; one of the most desirable of all dessert plums and one of the best for preserving or drying. February.

Kirk's—A first-class variety, large and black. Medium

Pond's Seedling—Fruit very large, oval, skin nearly covered with bright red or carmine; flesh yellow, juicy, and sugary; a beautiful fruit; good market or drying. February.

Prune d'Agen—Large purple; heavy bearer; the best prune grown. Medium.

Prune, Fellemburg (Italian)—Another good drying and preserving plum. Medium.

For Better Gardens and Best Results.

Prune, Splendour—Fruit very large and sugary; a free-stone; tree very productive, and a healthy and vigorous grower; ripens early for a prune.

Prune, Sugar—Tree very vigorous and productive; fruit extremely large, tender, rich, and very juicy. Very early. Nearly 24 per cent. sugar.

Prune, Tragedy—Very large, purple; one of the finest early plums ever introduced, being as large as the "Diamond Plum," and ripening just before "Rivers' Early Prolific"; fruit sweet, first-class dessert.

Robe de Sargeant—Medium size, rich and delicious; one of the best.

Rivers' Early Prolific—Below medium, purple, very prolific; excellent preserving, good dessert; tree a very heavy bearer. December.

Red Cherry (American)—An early variety; small fruit. Good breakwind.

DAMSONS.

Cole's Prolific—Good size for a damson; good quality and heavy bearer.

Damson, King of the Damsons—Tree very productive; fruit large and good. Medium.

English—Small, round, purple, good preserving; the tree is an enormous bearer, and the fruit will hang for weeks after it is ripe.

Farleigh Prolific—Fruit large, rounded, enormous bearer.

Shropshire—The best for jam. Medium.

JAPANESE PLUMS.

Burbank—Fruit large, round, red, with a lilac bloom, flesh yellow, very juicy, flavour excellent, tree strong grower and enormous cropper; one of the best Japanese; ripe early January.

Climax—The fruit is heart-shaped, larger than "Burbank," very highly coloured, and is ripe about a week before that variety; tree extremely vigorous and prolific. Flavour unsurpassed. The best Jap Plum for both home-growing or market. Early to medium.

Kelsey—A very large yellow and bright red plum; juicy and rich, very small stone; one of the best for canning and drying; carries well, heavy bearer.

Rubio—Very large, oval; crimson skin, very firm and fine quality flesh; strong grower and regular bearer. First-class Blood Plum.

Santa Rosa—Fruit very large and purplish crimson in colour; another excellent Blood Plum, and A1 for dessert; good strong grower.

Satsuma (Blood Plum)—Fruit large, round, dark red to the stone, which is small; ripens towards end of February, and will keep for a fortnight after being gathered.

Wickson—Fruit glowing carmine, with heavy white bloom, stone small, flesh of the fine texture, sugary, and delicious; will keep for two weeks or more after ripening.

Wright's Early—Fruit resembles "Burbank" in size and appearance, but ripens much earlier; like "Burbank," it is an enormous bearer, and at present is the best early Japanese plum known.

PEARS.

Bailey's Bergamotte—Very rich and melting fruit; a hardy grower and good bearer.

Capp's Favourite—One of the best early varieties; before "Williams' Bon Chretien."

Dorondeau—Fruit large and handsome, regularly formed, skin shining as if varnished on the side next the sun, where it is of lovely crimson, on the shaded side it is almost covered with a thin coat of cinnamon russet; quality good; ripens March and April; tree an immense bearer.

Glou Morceau—Large pear, yellow skin; flesh is buttery, melting and very juicy; excellent dessert variety; good for export.

Howell—Fruit large, light waxen yellow; heavy bearer, following "Williams' Bon Chretien"; a first-class market pear, and should be largely grown.

Josephine de Malines—Medium size, roundish, oblong, skin greenish yellow, flesh very juicy, melting, and richly flavoured; a good bearer and long keeper. Winter.

Kieffer—A first-class variety, medium size, pineapple flavour, strong grower, very prolific; second best for canning. Late.

Packham's Triumph—Raised by Mr. Packham, Molong, New South Wales; beautiful shape, large, good flavour; early and good cropper; ripe in April; good shipper. One of the best.

Vicar of Wakefield (Napoleon)—Large, juicy; heavy cropper; fine for market; good for export. Late.

For Better Gardens and Best Results.

Wilder—One of the earliest, good keeper and shipper; tree very vigorous; fruit medium, bell-shaped; pale yellow, with deep shading of brownish carmine, flesh whitish yellow, fine grained, tender, flavour sub-acid, sprightly, of good quality, very productive; probably the best early market pear. Summer.

Williams' Bon Chretien (Bartlett)—Commonly called "Duchesse" in this State; fruit large, skin clear yellow, sometimes tinged red, flesh melting, buttery, with a powerful musky aroma; the best of its season. Early.

Winter Cole—Medium pale yellow and russet, flesh melting, exceedingly rich and juicy. Exquisite flavour. Winter.

LOQUATS.

3s. 6d. each.

Chatsworth Victory—Fruit very large, with thick flesh; ripens late, and is of a very superior quality; the tree is a strong grower and good bearer, and is undoubtedly one of the best.

Early Oval—Fruit large, oval; a first-class loquat, and the earliest to ripen.

Enormity—The largest and finest loquat grown; very large fruit and good cropper.

Herd's Mammoth—Fruit nearly as large as "Chatsworth Victory," but ripening a little earlier; both varieties produce magnificent fruit if given good cultivation.

Large Round—Fruit very large, round, good quality; ripens very late.

QUINCES.

Apple-Shaped—Of medium size, juicy, and very nice for culinary purposes; productive.

Champion—A splendid American variety; fruit very large, flesh tender; the latest keeping variety.

Missouri Mammoth—Extra large fruit of excellent flavour; sturdy grower; prolific and early.

Masters' Early—Fruit large and good, roundish, skin golden yellow. A very handsome quince.

Pear-Shaped—Large fruit of a first-class quality. Medium.

Pineapple—Fruit medium size, clear golden-yellow; makes a superior jelly and is said to cook as tender in five minutes as the best cooking apple, possessing a most exquisite and delicious flavour.

Smyrna—The tree is a rapid, strong grower, and immensely prolific; commences to bear the second year from the bud; the fruit is very large and of a lovely yellow-lemon colour, presenting a fine appearance; the flesh when cooked is very tender, having a delicious flavour. Ripens in April and will keep till September.

MULBERRIES.

Black English—Makes a very fine tree for shade; the fruit also is useful for dessert or cooking. 3s. 6d. each.

CITRUS FRUITS.

From 4s. 6d. each; 48s. dozen; per hundred on application, for well-grown, healthy trees carefully balled.

MANDARINS.

Beauty of Glen Retreat—Very handsome, good flavour; very productive tree.

Emperor—Largest of fruit, very juicy; an excellent market kind. Good bearer. Particularly good.

Thorny—An enormous cropper of medium size; juicy and sweet flavoured.

Dancy's—Medium size, flat, almost scarlet; excellent quality; vigorous grower.

Canton—Large and prolific; fine flavour.

Nobilis—Medium size, flat, solid. Good.

ORANGES.

Ruby Blood—High quality of flavour; pulp a deep red when ripe.

Compuda—Large, oval-shaped fruit, of first-class quality; a regular and consistent bearer.

Mediterranean Sweet—Medium to large; oval, nearly seedless, thin skin, excellent flavour; ripens late, begins to bear early; requires protection from cold winds.

Parramatta—Fruit large and juicy; strong grower; good bearer.

St. Michael—Large, thin-skinned fruit, very few seeds; good bearer.

Siletta—Skin pale yellow, flavour good. One of the hardiest and best.

Valencia Late—Medium in size, round, skin smooth and thin. It does not ripen until late in spring, and it is valued on that account.

For Better Gardens and Best Results.

Washington Navel—Fruit very large, seedless, pulp juicy and well flavoured; strong grower and good bearer.

LEMONS (LISBON). CITRONS. POORMAN'S.

GRAPEFRUIT.

MARSH'S SEEDLESS. 4s. 6d. each.

Grapefruit is not well known here, but in America it is in great demand, particularly for the breakfast table. Its name is misleading. It belongs to the Citrus Family, the fruit borne in bunches from the end of the branches, in a somewhat similar manner to grapes, hence the name. The Grapefruit is like an extra large orange, is of light skin, and it has a slightly bitter flavour, which is relished when the taste for it is acquired. The fruit is cut in halves and the pulp eaten with a spoon. Grapefruit makes excellent jam. All home gardens should contain at least one tree.

PERSIMMONS.

3s. 6d. each.

The fruit of the Persimmon, when ripe, is of a deep reddish orange colour; shape that of an orange. The flavour when perfectly ripe is most luscious. It is best kept for a time after being picked, and is then most delicious. The fruit ripens during winter, and is in consequence valuable for the table at a season when fruit is scarce. Leading sorts available.

VINES.

Extra Strong Plants, 1s. each; 10s. dozen.

Belas Blanco—Large bunches of oval berries; a late greenish-white grape; a very good variety for packing.

Black Frontignac—Very rich vinous flavour; small; early.

Black Hambro—Thin skin, rich and juicy.

Black Prince—Very fine oval, black; rich, juicy, and sugary.

Black Mammoth—Black. Medium.

Black Muscat (Mrs. Pince's)—Bunches large, tapering berries, medium, oval, skin purplish-black. Late.

Cornelian (Quick's Early)—White. Early.

Centennial—Berries large, yellowish green. Does not crop well in South Australia.

Crystal—Bunch large berries, medium to large, skin white; one of the best. Medium.

Lasscock's Nurseries, Lockleys, South Australia.

- Doradilla**—Bunch large and closely set, berries medium to large, amber; a tremendous bearer and a good late packing grape.
- Grand Turk**—Large bunches, berries black; ripens soon after mid-season, but will keep for a considerable time on the vine if kept dry.
- Green's Early**—Berries and bunch medium, skin greenish white; sets well, ripens very early.
- Gros Colman**—Bunches very large; berries large and round, skin dark purple or black, flesh juicy and sweet.
- Lady's Finger**—Bunches medium to large; loose berries, long and tapering at both ends, skin greenish, becoming quite pink when ripe. Late.
- Malaga (Black)**—Bunch large, berries medium oval; skin tough, hangs late and carries well.
- Malaga (Red)**—Bunch large, berries large, roundish oval, skin red or reddish-purple when fully ripe.
- Mrs. Pince's Black Muscatel**—Black. Late.
- Muscat Alexandria**—Bunch large, loose berries, large oval, skin pale amber, sets very badly.
- Muscat Gordo Blanco (Muscatel)**—Bunch large, berries large, pale amber; a good bearer and the best for drying.
- Muscat Hamburgh**—Berries medium, oval, dark reddish purple, becoming black when fully ripe.
- Pedro Ximies**—Bunch and berries medium, pale amber, juicy, sweet, and well flavoured. Early.
- Raisen des Dames**—Large, greenish white. Early.
- Red Muscat (Woods)**—This is a sport from the well-known "Muscat Gordo Blanco," but the berries are of a beautiful red colour.
- Red Prince**—Bunches very large, berries large, round, of a deep red colour, becoming almost purple when fully ripe; flesh sweet, firm, and of fairly good flavour. Medium to late.
- Santa Paula**—In shape like Lady's Finger; a beautiful light colour; large bunches. Late.
- Sultana**—Bunches medium size and long, berries oval; skin pale yellow, flesh without seeds. Valuable for home use when dried.
- Sweetwater**—Bunches medium size, berries round, greenish white; an old favourite. Early.
- Ulliade**—Black, oval; medium berries; heavy cropper and good flavour. Medium.
- Waltham Cross**—Bunch very large, long, and tapering, skin pale amber, flesh firm and solid, with a brisk, pleasant flavour; one of the largest grapes in cultivation; good market or packing.

For Better Gardens and Best Results.

White Frontignac—Very rich, fine flavour; straw colour.

Wortley Hall—Bunch and berry very large, berries round, black; generally bears a heavy second crop, which are useful for making jelly.

Zante Currant—This is the Currant of Commerce, and is being extensively planted in this State for drying purposes; black, juicy, and sweet berries.

All the Vines this season are remarkably strong, well-rooted plants. Those who are wanting quantities should inspect our plants before ordering elsewhere.

MISCELLANEOUS FRUITS.

Raspberry—1s. each; 10s. per dozen.

Rhubarb (of sorts)—1s. each; 10s. per dozen. Mould's Crimson Winter, 2s. each; 20s. per dozen.

For Better Gardens and Best Results.

Strawberry—Gandy, Melba, 1s. dozen; 6s. per 100.

Illewarra, 2s. 6d. dozen; 15s. per 100. New Giant, 2s. 6d. dozen; 15s. per 100.

Walnuts—From 3s. 6d. each.

CHRYSANthemUMS.

Strong Plants, 1s. each; 9s. per dozen.

We have a splendid collection of Japanese, Large-flowered, and Single varieties of up-to-date sorts. Plants ready from August to December.

CARNATIONS.

Price, 1s. 3d. each; 12s. per dozen.

We have several thousand plants of real good varieties, with good calyxes, strong growers, and free flowerers. The sorts have all been proved, and include some exceptionally fine colours. Plants ready from March.

FUCHSIAS.

We grow the best varieties of Single and Double. Plants in season in full bloom make fine decorative plants. 1s. 6d. each; 15s. dozen.

PELARGONIUMS.

Regal and Show, 2s. each, 20s. dozen; and Zonale varieties, 1s. 6d. each, 15s. dozen.

FERNS.

We have a large collection of the best varieties suitable for Table Decoration, Ferneries, Rockeries, and Shadehouses.

The hardy varieties of Adiantums (maiden-hair ferns), Pteris, Nephrolepis, Cyrtomium, etc., we grow in thousands.

Prices, from 2s. each.

Small 3-in. pots of most varieties, 9d. each, 7s. 6d. dozen.

Specimen plants price on application.

DAHLIAS.

All the best varieties in Cactus, Paeony, Collarettes, Decoratives, etc., 1s. each; 10s. per dozen, our selection.

Collections at special prices. New stiff stemmed varieties, 1s. 6d. each; 15s. dozen.

LAWN GRASS.

Buffalo Grass—12s. 6d. per sack; fine sample, good roots.

Couch Grass—10s. per sack.

“Mail” Lawn Grass—Seed.

Kentucky Blue, Chewing's Fescue, and Couch Grass—
Prices on application.

HARDY ORNAMENTAL TREES AND SHRUBS.

This section represents a great variety of plants suitable for almost any kind of horticultural ornamentation. The heights given are approximate to ultimate growth, but vary according to soil and situation. They can all be kept within bounds by careful pruning, which we recommend being done just after flowering. We shall at all times be pleased to recommend varieties for any special purpose, and when large numbers are wanted will make special offers.

PLANT SHADE TREES ON THE FARM.

Many farms in Australia are practically treeless. Trees should be a prominent feature on all farms to add to the appearance, beautify the homestead, and to afford shade for the stock. Tree planting may be undertaken on the outskirts of the area and in corners of paddocks.

To afford an effective shelter for stock the trees should not be over-tall. Close planting will bring this about. Trees put in close will supply excellent straight timber for posts, but the foliage required as a break-wind will be furnished at too high an altitude to be effective.

Sugar Gums to provide effective shelter for stock should be planted at least 30 feet apart, and Aleppo Pines 30 to 33 feet. Closer planting is, of course, recommended for timber purposes.

We can supply the right trees for all districts at reasonable rates.

Lasscock's Nurseries, Lockleys, South Australia.

readily. When selection is left to us we will
send the best possible selling lines in season,
and supply at a most liberal discount. Special
care is given in packing to ensure safe
transit.

“Lasscock's Reminder” is printed Monthly and
available to all of our Customers. If you are not
getting a copy regularly each month, ask us to send
you one.

Oaklands, Y.P., October 9, 1928.

“I have been receiving your Monthly Reminder, and
have found it a good guide in choosing plants for my
garden. Some of the finest carnations I have ever
grown were from seedlings of yours, and the stocks
from your seeds were very good, indeed, almost all of
them being double.”—Mrs. J.A.B.

Barmera, September 11, 1928.

“I would like to take the opportunity of mentioning
how pleased I am with the seedlings I purchased from
you in May. The Stocks were greatly admired and
came over 80 per cent. doubles. Several Adelaide
visitors state they have never seen such size of flowers
and spikes from these.”

HARDY CLIMBING PLANTS.

E. signifies Evergreen. D. signifies Deciduous.

		Price.
D.	Ampelopsis Henryana —Velvety green, with silvery white mid-rib and veins; distinct	1 6
"	hederacea	1 6
"	Veitchi (Virginian Creeper)—Small-leaved and self-clinging creeper. This grows on the front of the Exhibition Building	1 6
"	Veitchi Purpurea —Darker green than Veitchi, changing to dark red in autumn	2 0

—Rich orange; a beautiful creeper; good foliage, flowers freely	2 6
D. <i>Wistaria sinensis</i> —Lavender	2 0
” <i>alba</i> —White, in drooping racemes	2 6

PALMS.

Chamærops excelsa (Windmill or Fan Palm)—Well shaped growth, very hardy. From 2s. 6d.

Chamærops humilis—Dwarf habit, good shape. From 2s. 6d.

Corypha australis—Very hardy, fan-shaped leaves. From 2s. 6d.

Cotton Palms—From 2s. 6d.

Kentia Belmoreana—Very graceful, largely used for table decoration. From 2s. 6d. each.

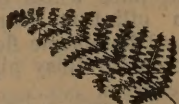

Kentia Fosteriana—Tall, elegant palm; the best of all palms for table or indoor decoration. From 2s. 6d. each.

Our stock of Kentias is very extensive, and we grow specimen plants in all sizes up to 50s. each.

Phoenix reclinata—Hardy, dark green feathery foliage. From 2s. 6d.

Phoenix Canariensis—Very handsome dark green leaves, similar to the Date Palm, but more graceful; one of the best palms for outside planting. From 2s. 6d. each. Fine specimens, 10s. 6d. to 30s.

Phoenix Roebelini—A charming palm for indoor decoration. From 7s. 6d. each.

HEDGE PLANTS.

Carob (*Ceratonia Tiliqua*)—This makes a magnificent evergreen hedge, and is very hardy. Plant 4 to 5 ft. apart. 2s. each; 20s. dozen.

Ceanothus divaricatus—When well clipped this makes one of the most ornamental hedges. It bears large quantities of blue flowers, which make it very effective. Plant 3 ft. apart. In pots, 20s. per dozen.

Coprosma Lucida—Makes one of the handsomest hedges, its bright leaves being always shining green, not holding the dust; quick growing and hardy. Strong plants, in pots, 10s. per dozen; 70s. per 100. Open roots out of seed beds, 4s. dozen; 25s. 100. Plants in pots are strongly recommended, as twelve months can be saved.

Cupressus Torulosa—A very pretty compact growing plant that makes an ideal hedge where space is limited, and also for dwarfer heights than that given by *Lambertiana Horizontalis*. It requires less trimming and is well recommended. Strong plants, in 5-inch pots, 3s. each, 35s. dozen; 6-inch pots, 4s. each, 45s. dozen.

Cupressus Lambertiana Horizontalis—One of the most beautiful hedges in cultivation. It is very hardy and immune from disease. The main stem (or leader) of each plant should be tied to a stake when planting, and allowed to grow to within six inches of the ultimate height of the hedge before it is clipped. Plant 4 to 5 ft. apart. The general planting size has been those in 5-inch pots, at 35s. dozen. Bearing in mind that a hedge is a thing most people require to flourish and grow quickly, we have this season made a special line in 6-inch pots, which are about 4 ft. high and twelve months older than those in 5-inch pots. These fine plants are offered at 45s. dozen; larger specimens in 7-inch pots at 65s. dozen; and very large plants in 8-inch pots at 85s. dozen. We have also some fine strong plants up to 6 ft. high at 10s. 6d. each and 105s. dozen.

Cupressus Lambertiana Horizontalis Aurca—A beautiful golden variety. Fine plants, 3s. 6d. each. Special extra sized plants, in 6-inch pots, 5s. each; in 7-inch pots, 7s. 6d. each.

- Cupressus Macrocarpa**—Makes a very good, compact hedge. Price, 1s. 6d. each; 15s. dozen. Larger plants, in 5-inch pots, at 2s. each; 20s. dozen.
- Duranta Plumieri**—A neat-growing evergreen plant, bearing clusters of purplish blue flowers. 1s. 6d. each; 15s. dozen.
- Duranta Ellisii**—This particular variety of *Duranta* is specially recommended. It is a remarkably quick grower if given right soil conditions and attention to watering, and is free from thorns. *Duranta Ellisii* is one of the finest shrubs in cultivation. 1s. 6d. each; 15s. dozen.
- Kaffir Apple**—3s. 6d. dozen; 20s. per 100.
- Laurustinus**—Very useful for a small hedge. Plant 2 ft. apart. 1s. 6d. each; 15s. dozen.
- Plumbago Capensis**—This makes a very showy and pretty flowering hedge, blue flowers; also can be had in white. Plant 2 ft. apart. 1s. 6d. each; 15s. dozen.
- Port Lincoln Wattle**—This makes a beautiful hedge and is particularly suitable for growing at the seaside. It should be kept well clipped. Strong plants, in pots, 1s. each; 10s. per dozen.
- PRIVET—Golden Variegated Privet**—This most beautiful Privet, with its fine richly variegated gold foliage, makes a most striking and handsome hedge; it is dense in habit of growth and it does not die out. The plants remain wonderfully healthy. Plant 2 ft. apart. Plants, in pots, 1s. 6d. each; 15s. per dozen.
- Rhamnus Alaternus**—This makes a dense hedge when well trimmed, but is a somewhat slow grower. 3s. 6d. dozen; 20s. 100.
- Spartium Junceum (Yellow Broom)**—Will make a fine ornamental hedge if kept well trimmed. In pots, 15s. per dozen.
- Tagasaste (Tree Lucern)**—2s. 6d. dozen; 15s. per 100.
- Tecoma Capensis**—A fine red flowering hedge, very hardy. 1s. 6d. each; 15s. dozen.
- Wormwood**—a nice silvery foliage, very useful for shelter for poultry. 1s. 6d. each; 15s. dozen.

**Our Reminder is printed Monthly and available to all
our Customers.**

For Better Gardens and Best Results.

GROW TREES FOR TIMBER.

It is generally recognised that vegetation has a great influence over rainfall. For that reason the planting of trees in quantity on farms and stations should be considered. Apart from the question of rainfall, the growing of trees for timber should be undertaken, particularly in the light of a threatened timber shortage.

Tree planting should be made in wide belts and in compact blocks rather than in single rows along fences, because when closely planted they grow straighter and better timber is obtained. Plant closely and afterwards thin out the trees to obtain posts and other useful timber.

Sugar Gums, Tooart Gums, Red Gums, Tasmanian Blue Gums, and others are useful, as are also the Pines—*Halepensis* (Aleppo Pine) and *Insignis* (The Remarkable Pine).

We can supply these and others in large lots at specially reduced rates. Get Lasscock's quotations.

CONIFERÆ PLANTS.

	Height in Feet.	Price.
<i>Araucaria excelsa</i> (Norfolk Island Pine)— From 2s. 6d.	100	
<i>Biota Aurea</i> —A small class of pine; compact growth. From 3s. 6d.	6

LESSCOCK'S "QUALITY" SEEDS.

IN LIBERAL SIZED PACKETS.

All at 6d. each, unless otherwise priced.

Lasscock's Seeds are guaranteed to be of the Best Strains obtainable. No cheap and stale seed is offered.

FLOWER SEEDS.

We are large importers of the best quality Flower Seeds from the world's leading seed growers. We do not offer the cheapest seed, but the best seed procurable is sold to customers, who may rely upon its quality and productiveness.

Our special strains of Pansy, Phlox, Aster, Cineraria, and Stocks have given entire satisfaction to the many customers who have reported upon their successful results.

The following varieties of the more popular flowers are here listed. Other special seeds that may be required can be obtained on application.

The letters A and S refer to the seasons for sowing the seeds, A signifying Autumn and Winter sowing; S, Spring and Summer sowing.

Acrolinium Roseum—Useful everlasting.

" **Roseum fl. pl.**—Double rose.

" **Album**—Double white. (A)

Ageratum Mexicanum. Imperial Dwarf—Blue.

" **Imperial Dwarf**—White.

" **Blue Perfection**—Very free blooming, large flowered, mauve; very compact.

" **Mauve Beauty**—Large mauve flowers, dwarf, compact; very free flowering. (A, S)

Alyssum, White—Sweet (annual). (A)

Alyssum, Carpet of Snow—A very pretty bordering or edging plant, covering itself with a mass of snow-white flowers. Seed sown in autumn will flower in July, and keep in flower for a considerable time. 1s. per packet.

Amaranthus Tricolor Splendens (Jacob's Coat)—Very rich colouring.

Anemone, St. Brigid—Royal Crown strain; extra choice mixed; enormous blooms, with great variety of striking colours. (A)

For Better Gardens and Best Results.

- Antirrhinum**—Tall; splendid mixed; very fine.
- " **Intermediate** (or Dwarf)—About 1½ ft. in height; very suitable for bedding; great range of colour. This section is strongly recommended.
- " **Choicest Mixed**—From over 30 varieties.
- " **Black Prince**—Dark crimson flower; very dark foliage.
- " **Beacon**—Salmon rose, gold-tipped centre.
- " **Coccinea**—Scarlet.
- " **Cottage Maid**—Pure coral pink, white throat.
- " **Electra**—Salmon, maize and orange. An improved Fiery Belt.
- " **Fiery Belt**—Vivid orange, white throat.
- " **Flame**—Lovely brilliant orange scarlet, well fixed; an exquisite variety.
- " **Golden Queen**—Large flower, rich colour.
- " **Nelrose**—Rich coral pink.
- " **Queen of the North**—White bedding variety, with small yellow spot.
- " **Rose Dore**—Pretty self salmon rose.

- Parsley**, Extra Triple Curled. (A)
- Parsnips**, Hollow Crown—Select; long roots.
- " **Stump Rooted.** (A)
- Peas**—Sow every few weeks during autumn, winter, and spring, in rows 2 ft. apart for dwarf early sorts, and 3 ft. to 4 ft. for late tall varieties. Stake the latter as soon as the tendrils appear. The Dwarf sorts, although generally grown without, are benefited by a few sticks. The seed offered is the best obtainable, imported from New Zealand. (A)
- " **American Wonder**—One of the earliest.
- " **Carter's Lightning**—Earliest round pea; very prolific.
- " **English Wonder**—An early dwarf pea; abundant cropper.
- " **Early Sunrise**—Very hardy and prolific.
- " **Greenfeast**—This fine variety will become very popular when properly known. It is a second early pea, with deep green pods, curve shaped, packed with an average of six to seven peas in each pod. A very hardy variety of robust growth and good flower. Strongly recommended. 1s. per packet.
- " **Richard Seddon**—An early dwarf pea with well-filled pods, of fine colour and flavour.
- " **William Hurst**—An early variety; abundant bearer.
- " **Strategem**—Very heavy cropper; remarkably well-filled pods.
- " **Te Aroha**—Very prolific; very good for market growers.
- " **Yorkshire Hero**—Good flavour and abundant bearer; the most popular. (A)

For Better Gardens and Best Results.

Pumpkin, Iron Bark—Well-known variety; medium size; good flavour.

„ **Turk's Cap**—Green, striped white, flesh orange of fine quality. Culture as for melons, but holes 3 ft. to 4 ft. further apart.

Radish, Chinese—Long, solid, white. (S)

„ **French Breakfast**—Oval, scarlet, tipped with white; excellent flavour.

„ **Icicle**—Long white, crisp and tender.

„ **Long Scarlet**—Well-known popular variety.

„ **Mixed Turnip**—Red and White; very early.

„ **Delicacy**—Long, white, very tender and mild. (A, S)

Rape, Broad-leaved Essex—Leaves used as Spinach. Sow in drills 1 ft. apart. (A)

Rhubarb, Victoria Giant—Very large and thick stalk; good quality.

„ **Topp's Winter**—Very prolific; fine flavour, long stalks. In perfection during winter, when other varieties are at rest. (S)

Spinach, Prickly or Winter.

„ **New Zealand Spinach**—A valuable summer vegetable. Sow in September and October. (A, S)

Sweet Corn, Country Gentleman—Very productive and luscious; a great favourite. (S)

Tomato, Lasscock's Early Dwarf Red—The best and largest fruited of all the Dwarf Tomatoes; ripens early; excellent flavour. The Tomato that is most generally grown, both under glass and outside. 6d., 1s., and 2s. 6d. packet; 7s. 6d. ounce.

„ **Lasscock's Surprise**—See page 99.

„ **Lasscock's Wonder**—See page 101.

„ **Burwood Prize**—Vigorous and hardy; second early; smooth and solid; potato-leaved.

„ **Orange Sunrise**—Superb bright orange fruit, good flavour.

„ **Ponderosa**—One of the largest Tomatoes; handsome, smooth and very solid.

„ **Excelsior**—Fine late variety; does well in the Hills. (S)

Trombone, Large Green—Flesh orange; excellent flavour; keeps well. (S)

Lasscock's Nurseries, Lockleys, South Australia.

- Turnip, Early Stone**—One of the best for general use; flesh white and of good flavour.
- " **Early Purple Top**—Very quick growing and early; small tops.
- " **Early Wonder**—Very early, with medium long roots; something like a Radish.
- " **Early New Model**—Exceedingly early; splendid shaped roots.
- " **Golden Ball**—Rich flavour; the best yellow.
- " **New Model**—The finest Early White Stone variety. Splendid shape and firm flesh.
- " **Snowball**—Quick grower; fine flavour; one of the best; early.
- " **Purple-top Swede**—The best garden Swede. (A, S)
- Vegetable Marrow, Custard Bush**—Extra early, white scalloped; a good early summer Marrow.
- " **Bush Green**—Excellent quality, prolific and early; does not require much space, as they do not trail.
- " **Bush White**—Very distinct; skin smooth, marbled yellow.
- " **Feltham Prolific**—This remarkable Marrow combines the good qualities of both the running and the bush classes from a union of which it is derived. It ripens its smooth white fruit as early as, or earlier than, the bush sorts and is more prolific. 1s. per packet.
- " **Long White Runner**—An abundant and certain bearer. (S)
- " **Rotherside Orange**—The flesh of this excellent new Marrow is firmer in texture than that of the ordinary variety, and possesses a delicate and characteristic flavour that pleases all who have tried it. The plant is extraordinarily prolific, producing deep golden early-ripening fruits of a slightly flattened globe shape. This variety is just what is wanted for the ordinary home, being small-sized it does not require cutting (causing waste) to make several meals like a lot of the Marrows. 1s. per packet.
- Herbs**—Sage, Thyme, Marjoram, etc. (A)

Our Reminder is printed Monthly and available to all our Customers.

FLOWER SEEDLINGS.

We specialise in raising Flower Seedlings, and grow plants from Seed of the Best Quality. The Seedlings are hardy, being grown in the open, and any person visiting the Nurseries will note the extensive manner in which they are grown.

Flower Seedlings can be forwarded post free anywhere in the State (other States 6d. extra) at the small cost of 4s. 3d. per 100. Seedlings at Nursery, 6d. per dozen; 3s. 6d. per 100.

LASSCOCK'S TOMATO PLANTS.

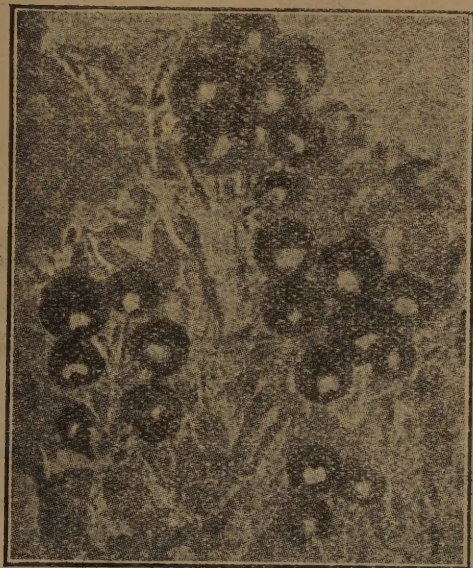

We have specialized in raising Tomato Plants for many years, and, having grown a great number of sorts during that time, we have found that the **Early Dwarf Red** is far and away the best all-round Tomato grown, and strongly recommend it to the private grower and market gardener alike as the best Early, the best Medium, and the best Late.

Ponderosa and Burwood Prize can be supplied for later planting.

By growing in succession you can have Tomatoes from September (under glass), outside up to April.

Plants can be had from June until December at 1s. per dozen; 6s. per 100, 40s. per 1,000.

For Better Gardens and Best Results.

ANOTHER NEW TOMATO.

LASSCOCK'S SURPRISE.

This very fine Tomato was grown by us for several years, and proved to be well worthy of a place in every garden. It is not so tall in growth as Wonder, but the fruit is larger and is borne on long trusses of from twelve to twenty. It is of a deep red colour, fine smooth skin, and a tremendous cropper. This new comer will set very early, and it makes a good companion to "Lasscock's Wonder."

Seed, 1s. packet; Plants, in season, 1s. 6d. dozen.

A NEW TOMATO, "LASSCOCK'S WONDER"

A NEW TOMATO.

"LASSCOCK'S WONDER."

As can be seen by the photograph reproduced here, this Tomato is a remarkably prolific variety. It produces fine smooth fruits of an even size. It is not a large Tomato, but just what is wanted for the table. The flavour is excellent, and the flesh is a fine, solid, deep scarlet. All who saw this variety grown at the Nursery last season were unanimous in their praises of it. It is a very tall grower and is best tied up to long stakes. If too many fruits set on the one truss it is wise to thin out to about twelve fruits. As it has very little seed, it makes it rather expensive to collect, but we have saved a fine lot and can supply a limited number of packets in season at 1s. 6d. per packet. Strong plants will be ready about the end of July at 2s. per dozen. Be sure and try Lasscock's Wonder this year.

A NEW TOMATO.

"LASSCOCK'S WONDER."

As can be seen by the accompanying photograph, this Tomato is a round, smooth, medium-sized variety. It produces fine smooth fruits of a red color. It is not a large Tomato, but just what is wanted for the table. The flavor is excellent, and the flesh is a fine white, deep red. All who saw this variety at the Nursery last season were much interested in its quality. It is a very tall growing plant, and is very long stalked. It has many fruits on the main stem, and it is wise to thin out the lower foliage. As it has very little seed, it makes a very good variety to collect but we have saved a fine lot and can supply a limited number of packets in season at 10 cts. per packet. Strong plants will be ready about the end of July at 25 cts. per dozen. Be sure and try Lasscock's Wonder this year.

IT FOR YOU.

SOME MORE APPRECIATIONS.

Lasscock's Plants and Seeds Give Satisfaction.—
Broken Hill, July 4th, 1927. I received rose trees and
seeds in excellent condition, thanks to your very able
manner of packing. (Signed) A.T.H.

Lasscock's Plants and Seeds Give Satisfaction.—
Werribee, Victoria, September 29th, 1927. Kindly
forward me on some more of your Blight Proof Cauli-
flowers. I tried this variety last year and found them
a great success. Postal note enclosed for same.—
(Signed) A.E.T.

Lasscock's Plants and Seeds Give Satisfaction.—
East Geelong, Victoria, October 17th, 1927. Re your
letter and 1 oz. Cauliflower Early Green Leaf to hand
on the 12th inst. Trusting things turn out as good as
last year's seed. They were perfect.—(Signed) C.A.B.
